Specialities:

Gear:

Summary: (machine translated)
O Canal de l'Ermità Mort, is a dry torrent, typical of the area but without great interest, considering the good channels that are in the area. It is perfect to combine the descent with the via ferrata of the Ladies and thus lengthen the day.
Prohibited from January 1st to July 31st.
Regulated descent: https://muntanyamontserrat.gencat.cat/ca/el_parc/canals-i-recorreguts-equipats/

Hydrology:

Access: (machine translated)
We must be located in Collbató in the heart of Montserrat.
Once in the village we will look for the indications to get to the restaurant Vinya Nova where we will park.

Approach: (machine translated)
We have several options:
1.- Directly going up the Torrent del Pont, when we reach the height of the Roca Mala (we leave it on the left), we will take the path of "cova de la Murdela" and after passing it, soon we arrive at our channel.
2.- By the VF de las Damas, after leaving it we will look for the path to l'Artiga Alta on our left, we will take this path along the ridge to enter this small cirque and go to the Coll dels Pollegons. From here we will only have to go down to "cova de la Murdela", a few meters before we have the channel on our left.
3.- Similar to the access by the VF de las Damas, just before the entrance we can turn left to go up the equipped channel of l'Artiga Alta. It is not a ferrata as such and we will have some somewhat exposed steps in which to make climbs and steps in opposition. Once up, we will continue the same as in the previous case towards the Coll dels Pollegons.

Tour: (machine translated)
Easy descent with only 5 rappels. The most complicated are the intermediate rappels R3 and R4 with their ledge. But if we see it bad and we have enough rope we can do a 34m rappel to the bottom.

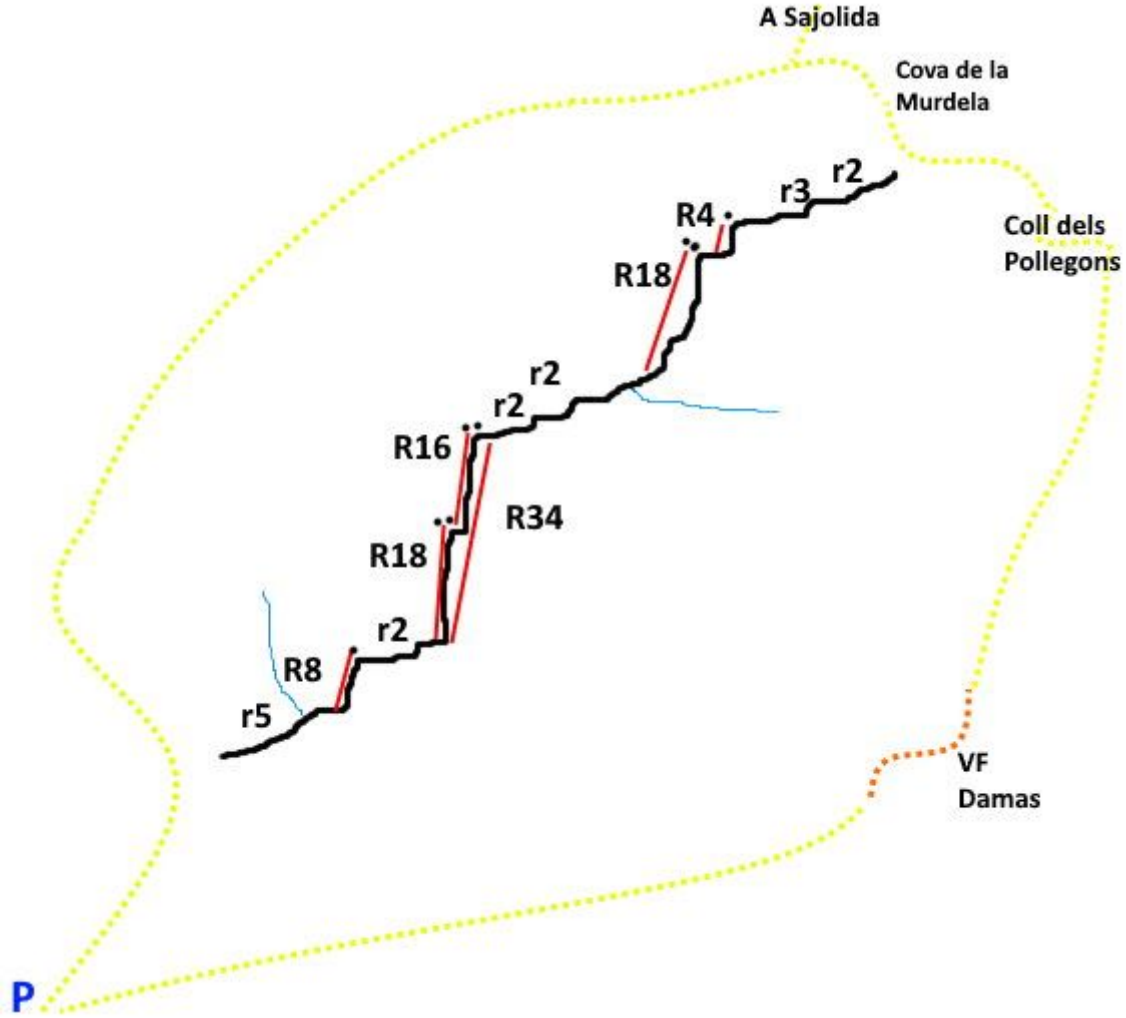

Return: (machine translated)
We will continue climbing up to the torrent of Pont and here we will take the access path.
