| <b>Summary:</b> (machine translated)<br>Impressive and entertaining descent in pristine scenery.   |                                    |                                       |
| <b>Hydrology:</b>  |                                    |                                       |
| <b>Access:</b> (machine translated)<br>From Sagone, located north of Ajaccio on the west coast of Corsica, we take the D70 for about 13.5 km to Vigo. From here we continue east on the D23 towards Guagno. After 12.2 km we turn left onto the D123 and drive up to Soccia (18.6 km from Vigo). We park the car in the northwest of the village, close to where the road comes up from Ziocu (few parking possibilities).<br>With the second car we continue up towards Lac di Creno. At the exit of the road we park the second car in a large parking lot under a huge metal cross. |                                    |                                       |
| <b>Approach:</b> (machine translated)<br>Continue 1.3 km on a dirt road to its exit. Next to the bridge we climb into the streambed.   |                                    |                                       |
| <b>Tour:</b> (machine translated)<br>Descent in alleys of granite with various possible jumps. At the first higher rappel (C20), a powerful shower can not be avoided. More attractive rappels follow until the canyon opens up. In the lower, more open part there are also a few rappels. Then some tedious block climbing to the bridge (approx. 30 min).<br><br>There appears to be an emergency exit to the left after the narrowest part (area after a solid iron rail wrapped around a boulder).  |                                    |                                       |
| <b>Return:</b> (machine translated)<br>Get off at the bridge and take the path to the left in about 20 minutes back to Soccia to the car below.  |                                    |                                       |

Automatisch importiert von Descente-Canyon.com für Canyon Ziocu RAS - équipement de qualité sauf le dernier rappel mais pas sûr d'avoir visé la bonne rive. Remonté au milieu pour éviter la fin interminable selon les retours. Par contre la sente de remontée introuvable ... ça a finit en sortie sanglier (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2327/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Ziocu Petit débit correct, sans soucis pour la C21. Dans l'eau à 10h, c'est un peu tôt pour la couleur de l'eau, mais on était seuls. Bravo à ceux qui ont fait le chemin de retour après la C15, super efficace pour éviter la navette :-))Superbe canyon (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2327/observations.html>)
