<b>Specialities:</b>		
<b>Gear:</b> Ropes: 2x50m		
<b>Summary:</b> (machine translated) Beautiful cascades		
<b>Hydrology:</b>		
<b>Access:</b>		
<b>Approach:</b>		
<b>Tour:</b> (machine translated) The tour begins at 680m with a longer walking and downclimbing section with a few small steps that can be jumped (be careful!) or downclimbed (max. 10m). After approx. 40-45 minutes you reach the highest abseiling point. First you rappel 10m and then you can choose between the 37m right (slippery) in the water or left out of the water. Shortly afterwards, there is another 20m abseil (left). After this last higher rappel, there are two small slippery steps, the first of which is downclimbed on the left and the next on the right. The following blocked open terrain is bypassed as far left as possible until you reach a forest road (Steinmanderl). Exit at approx. 480m.		
<b>Return:</b> (machine translated) Follow the forest road for only about 80m. Then follow the inconspicuous path left on the orographic right side of the stream. After a while, the path changes to the left side and soon leads to the bridge/parking lot at 380m. Here the stream flows into the Rio Toco.
