Canyon length: 1000m	**Highest rapell:** 27m	**Amount rapells:** 3
Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Parallel ravines on the outskirts of Alcalá del Júcar. Of collector, much vegetation in the Noguera I, Although it has a cantilever of 27 meters for which it is worth doing it. Recently reinstalled in December 2023.
The Noguera II is cleaner, the two channels flow into each other, and then into the ravine of Casas del Cerro. Ideal to combine in the same day.

Hydrology:

Access: (machine translated)
We must be located in Alcalá de Júcar.
By the CM3201 towards Casas del Cerro, about 300m before reaching the village we leave the detour to the right and continue along the road until pk56 where we see the access to Noguera II on our left. Here there is a track on our left just at the head of the ravine where we can park.
If we want to make a combination we can park at the exit of Alcalá de Júcar.

Approach: (machine translated)
Access to Casas del Cerro, Nogueras I and Nogueras II ravines.
The access is obvious and immediate to Noguera II. For Noguera I we will follow the track 300m to the next canyon.

Tour: (machine translated)
The Noguera I, a lot of vegetation, there is a "way" on the right just after the first rappel, near the wall to avoid the jungle, and a possible escape to the upper area, or you re-enter through the more open area, if you want to continue.
Noguera II is a little cleaner, at the confluence of the two channels, better to go out to the road, it is very dressed and the advance is very painful, almost impracticable.
Of collector.

Return: (machine translated)
At the confluence of the two we will go out where we can to the right to go up to the road, the 400m to the left we will see a track that goes up the canyon and redirects it to the parking area.

Coordinates:
Canyon Start 39.1806 -1.4085
