Difficulty: easy	**Grading:** v2 a2 III	**Total time:** 4h15
Approachtime: 1h15	**Tourtime:** 2h	**Returntime:** 1h
Altitude entry: 150m	**Altitude exit:** 1m	**Delta Altitude:** 149m
Canyon length: 1400m	**Highest rapell:** 15m	**Amount rapells:** 11
Transport: on Foot	**Rock type:** limestone	**Drainage area:** km²
Season: February - May	**Orientation:** Northwest	**Best Time:**
Rating: ☆ 3.6 (11)	**Info:** ★ 2.2 (5)	**Belay:** ★ 2.9 (9)

Specialities:

Gear:
Ropes: 1x30m / 2x20m

Summary:
Beautiful descent in a wild habitat with beautiful pools and canyon ending into the sea. Dry in summer.

Hydrology:

Access:
If returning by boat leave a car in Port de Soller, big paid parking near Parc Municipal.
If returning on foot leave a car in S'iletta de Can Gordo (narrow and bumpy road).

With the other car follow directions for "Mirador de Ses Barques", where you can park or along the road.

Approach:
From "Mirador de Ses Barques" the main road is closed by a gate and only residents, authorized people and customer of farmhouse "Balitx d'Avall" are allowed to pass. Otherwise follow the road and take the first descending road on the left and than follow the signs for the marked path, with some other open pedestrian gates, which will bring you back to the main road shortly after. From there follow it till the farmhouse "Balitx d'Avall", overcome it on the right and follow the streambed, which can appear dry, until it is joined by a tributary and usually the water flow appears right after the first pool.

From the lower parking lot "S'iletta de Can Gordo" follow the path towards the canyon, go over a gate before the second gate and descend briefly to the left to then immediately change to a beautiful path that runs horizontally over the cliffs. Follow the path until you reach a stone with red color markings, turn left down towards es Joncar, the exit from the sea, slightly uphill to the right the path leads to our ascent, the Pas d'es Heura. Follow the path into a saddle below a prominent rock tower (short climbing passage below a rock wall - do not climb up under the wall on the right). Behind the notch, descend fairly straight under the wall on the right, cross the valley and hike towards a rock amphitheater on the other side (cairns). If you only want to walk the lower part of the gorge, you can easily reach the stream here by descending through the valley. Climb over a rock ramp to the upper edge of the rock amphitheater and follow the climbing tracks and cairns for about 200m until you reach a sand road. Either follow this sand road uphill until another road branches off to the left, or onto the secondary ridge that drops into the Balitx valley on its right side and stay on it (stone wall) until you can descend to the right over steep forest terrain. You end up in a mostly dry side ditch which you follow to Na Mora.

Tour:
Beautiful and not too demanding canyon with some nice pools to jump. The 1st part (until Cala Ferrera) is very open with only a few narrow sections. From the middle the canyon becomes increasingly narrow and continuous. If the water level allows it, you can do without the rope except for a few places (but just for descent) alternating jumps, downclimbs, slides and short swimming passages until you reach the sea.
Most pitches are equipped with fixed ropes that allow you to climb back over the ropes if the sea route is not possible. However, you should not rely on the presence of these ropes and take enough rope with you.

Return:
Option 1: once at the sea, swim out through a narrow channel, then turn left and swim through two bays before coming ashore in front of a 15m high rock (impossible even in moderate swell, so pay attention to the weather forecast), for an overall swimming distance of about 500m. In the erosion slope above the rock, a path begins that leads steeply and with difficulty back to the access path from "S'iletta de Can Gordo".

Option 2: return by boat, contact Sollermar which will wait for you at the canyon end and bring you back to Port de Soller; beware that there is bad mobile connection in the canyon and at the exit, so plan well in advance the timing and agree the collection time

Option 3: climb back the canyon, in most of the pitches there are fixed ropes but beware to always check.

Coordinates:
Canyon Start 39.8162 2.7378
Parking at Entry 39.7908 2.7250
Parking at Exit 39.8113 2.7117

Automatisch importiert von Descente-Canyon.com für Canyon Na Mora Première partie "banale" mais qui devient sublime après l'échappatoire.retour par la mer par houle de 0.2 vraiment magnifique. 40min de nage jusqu'a es joncar. Les cairns ne sont pas visibles du premier coup, il faut être vigilant au niveau d'un gros rocher vertical d'une quinzaine de mètres de haut. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2838/observations.html)

Except for a short dry part, nice clear pools and also running water. Almost everything is jumpable in the first part. There are many (partly damaged) fixed ropes, 1x we had to set up ourselves. The way back was just under 1 km in the sea (fins were helpful), then we scrambled up the hiking trail. (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Na Mora On s'est garé à Port de Soller et on est rentré à l intermédiaire pour ne faire que la partie basse. Il reste de l'eau dans les vasques mais ça commence à croupir. L'arrivée dans la mer est magnifique. On a nagé 1200 m pour arriver sur une plage de bloc où il était assez facile de sortir malgré une mer un peu formée.Ne pas hésiter à prendre des bonnes palmes.Partie basse équipée en fixe sur sa totalité, on pourrait imaginer de rentrer en mer pour accéder au bas du canyon et de le remonter. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2838/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Na Mora Vasques propres et de petit filet à sec selon les endroits. Sortie par la mer facile aujourd'hui et quand on connaît bien. 30' de nage pépère. Pas de meduse.c'était croupi vendredi dernier mais les pluies de la nuit de lundi soir ont nettoyé les vasques. Remontée au mirador avec le bus de 18h40 au port de soller. (Quelle: https://www.descente-canyon.com/canyoning/canyon-
