Summary: (machine translated)
Raw data import from Ropewiki https://ropewiki.com/Veveyse_de_F%C3%A9gire

Not very exciting tour because simply too flat, about 4 rappels on about 3km.
Flat canyon with the possibility to get off between the individual drops - not a bad option for an "after-work tour". (machine translated)

Hydrology: (machine translated)
Medium-sized catchment area, so wait a while after the rain.

Access: (machine translated)
Either park at the bottom and walk up in the forest to do the last 2 steps, or park at the top and then walk along the streambed forever.

Approach:

Tour: (machine translated)
Two individual rappels in the upper section, unfortunately always interrupted by runs of over 500m. At the exit there is a nice gulch with a 20m waterfall, but that's it.

Return: (machine translated)
In 5-10 minutes you are back at the road along the streambed.

Unfortunately a lot of walking, otherwise it would motivate me to jump in for a short time. (machine translated)
