Country: España / Spain **Region:** Asturias, Principado de / Principality of Asturias **Subregion:** Asturias **Town:** Amieva

Difficulty: a little difficult	**Grading:** v1 a4 II	**Total time:** 2h35
Approachtime: 5min	**Tourtime:** 2h	**Returntime:** 30min
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 1000m	**Highest rapell:** m	**Amount rapells:**
Transport:	**Rock type:**	**Drainage area:** km²
Season: March - August	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Without technical difficulties except for the flow itself, it can be an interesting option for a hot summer day. For collectors or to discover small corners.
Caution with the flows in the rainy season, it has a very wide hydrographic basin.

Hydrology:

Access: (machine translated)
On the N625 Riaño to Cangas de Onís. In Vega de Cien, pk 139,5, we will take the detour to the left to Argolibio. We will go along this pretty and winding little road through the mountains and small villages. Past Argolibio the road descends towards the river Cormenero, a couple of curves linked leave us in the riverbed, although at this point it is difficult to park. We will continue along the road for 100m until two curves linked (right-right) and in the second one we have a place on the right where to park.
It is an access road, so we must park where we do not disturb.

Approach: (machine translated)
We could cross the farm towards the river but, out of respect, we better go down the road to the river bridge and take the path on the orographic right.
After passing an old bridge we will get into the riverbed just before the beginning of the boxed part of the trail.

Tour: (machine translated)
Aquatic trekking with small cliffs, some slides and even some small jumps.

Return: (machine translated)
When we reach a bridge just before the Sella we will exit to the right to take the PR that goes up the river on the orographic right.

Coordinates:
Canyon Start 43.2551 -5.1250
