Summary: (machine translated)
Hiking, swimming and downclimbing in a narrow canyon

Hydrology:

Access: (machine translated)
Leave the A-9 'la Languedocienne/la Catalane' (Montpellier-Barcelona) at exit 41 just before Perpignan and take the D-117 through Rivesaltes in the direction of Quillan. Approx. 35 km from Rivesaltes you reach Saint Paul de Fenouillet, where you turn right (north) onto the D-7 (direction Cubières sur Cinoble).
After about 41½ km of driving, the last part uphill, you will reach a large parking lot at the entrance to the canyon, where you can also get a good overview. Park your car here.

Approach: (machine translated)
Continue along the road blasted into the rock high above the canyon until you can easily descend to the left into the streambed of the Agly.

Tour: (machine translated)
The canyon, which is up to 100 m deep, offers an impressive tour that is also heavily frequented commercially and is very suitable for beginners. A helmet is essential due to the risk of objects being thrown into the canyon from the road running along the top. Short ropes can be helpful.

Return: (machine translated)
As soon as the canyon widens, turn left up to the parking lot. You can also continue for approx. 400 m through another narrowing (mainly swimming) and then up to the left after the dam (30 min.)

Coordinates:
Canyon Start 42.8456 2.4780
Parking Entry and Exit 42.8357 2.4800
Canyon End 42.8372 2.4806
