Access: (machine translated)
Leave the Autostrada A 4 (Milano-Brescia) between Bergamo and Brescia at the Ponte Oglio exit and head north along the SP 84 and 91 to Sarnico on Lago d'Iseo. From here continue northwards to Adrara San Rocco. Through the village and continue in a northerly direction on Via Martinelli down to the stream, cross it on a bridge and park the car just beyond the bridge.\nP.v. Duin shows in his book a possible car shuttle, but with 6 km driving distance and then 25 min. access time should bring nothing.

Approach: (machine translated)
At the bridge follow the sign "Cucche" on the Sentiero "744". Soon you go uphill away from the stream in an easterly direction, the path then bends towards the NE. After about half an hour you come to a bridge with green railings and yellow stripes. A little more than a quarter of an hour on the Sentiero 744, then we keep left down to a stone storehouse and continue pathless and steeply down to the streambed. We reach this below a verhaus of freshly cut (April/May 2012) trees and branches.

Tour: (machine translated)
After a longer approach in the open streambed, a pleasant descent through a narrowing without large dimensions.

Return: (machine translated)
At the exit of the narrowing right out and under the overhanging rock wall along the valley to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Guerna Débit sportif après les pluies. Pour les canyonistes aguerris, dans ces conditions, sinon le canyon est très ludique, très beau. Quelques mouvements d'eau, mais on peut les contourner. Mais c'est la grande cascade du début qui pousse, et glisse, un véritable tobbogan. C'est la seule grande, 24m, après ce sont seulement des petits ressauts. Impossible de tenir debout. Avant la vasque , il faut sauter dans la veine de gauche, sèche, pour éviter le mouvement d'eau à l'arrivée, Mais le bassin est large, on s'en sort facilement. Pour les suivants, un débrayer- tirer depuis le bas est bienvenu. Accès : après 30 min de marche en montée, passer un petit affluent, sur le sentier rive droite, et peu après noter une sente à gauche qui descend légèrement jusqu'à des cordes fixes couleur "terre" qui permettent de descendre verticalement en glissant dans le sous-bois boueux. On rejoint ainsi le ruisseau, à 3 min de la grande cascade , en évitant 45 min de marche inutile dans le ruisseau. Très beau parcours, relativement cours: 5 ou 6 ressauts à cordes. 2 obligatoires, sinon ça saute. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22789/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Guerna All anchor points in order, flow normal/medium but very cold due to the slight wind and the cold water of the pools after every jump or toboggan.
