Specialities:

Gear:

Summary: (machine translated)
Open canyon and generally dry except after rains. A couple of rappels, especially the last one, spectacular with water. The access is quite long.
Regulation of the Parc Natural del Port:

Hydrology:

Access: (machine translated)
We must be located in La Senia
We will have to go from La Senia by the CV105 towards Fredes, when crossing the bridge of the reservoir of Ulldecona, we will see a track on the right by which we will go up with the car. After passing the tail of the reservoir we will have a fork, on the right the Bco de Fou. The track crosses several times before reaching the source of Teix and soon we will have the confluence of Fou and Avellanar. We go up Avellanar until the track crosses the riverbed and we park.

Approach: (machine translated)
Two options:
1.- Along the track to, before the Cantinell needles, go up the path of the canal de la Lluisa towards the Collet de Gravis (somewhat losing and harder).
2.- Following the track we will pass the fence and go up towards the Pi Gros and the Font de Retaule towards the beech forest of Vallcaneres. We will find a PR indicator towards Els Plans. Continuing south we will arrive at the detour just before the Collet de Gravis. We will continue towards the Font del Teixet where we will access the ravine.

Tour: (machine translated)
Fairly open except for two fattened areas. The final part with its flying R38 is spectacular.

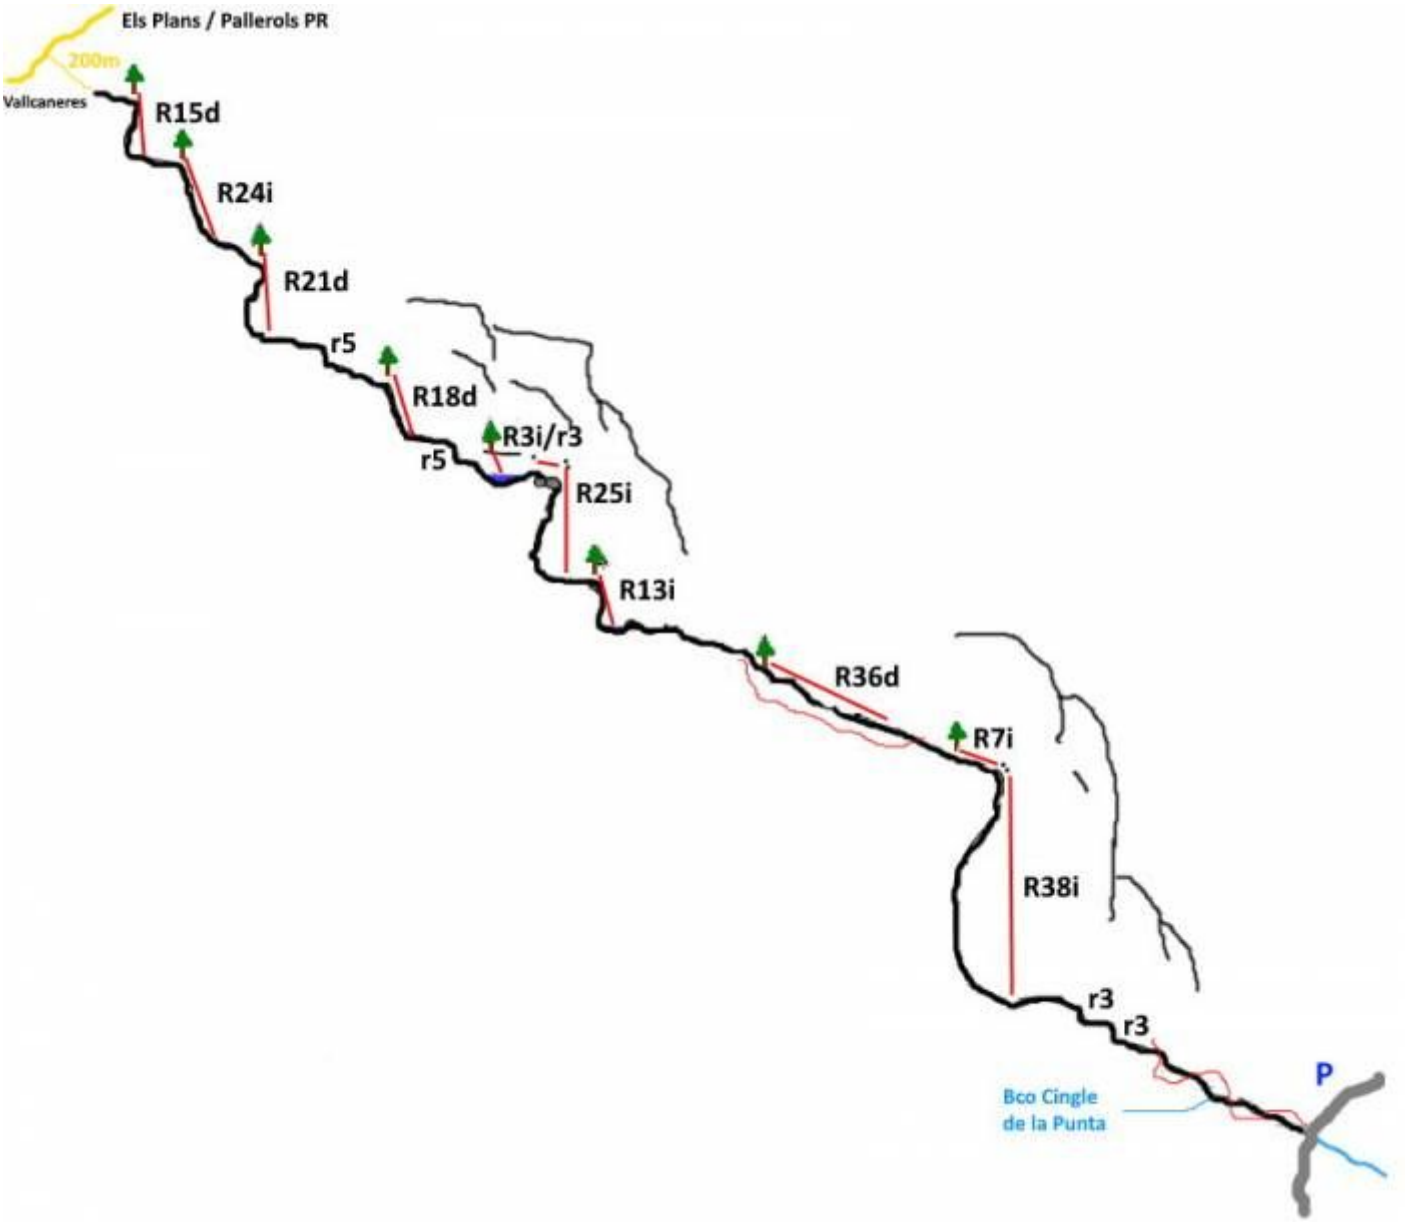

Return: (machine translated)
Almost immediately to the access road
