Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Short but interesting gully after rains, the final stretch is fantastic. To combine with Maclac

Hydrology:

Access: (machine translated)
In the village of Beceite we follow the signs to the natural area Les Pesqueres.
After the Crontol Point we follow without loss the track, first asphalt then dirt, which goes through all the parking areas until the last one (P15) where we park.
ATTENTION LARGE VEHICLES: the road to Les Pesqueres, in its passage through the village, has a narrow point of just over 2 m.
At the same time it is not allowed to park vehicles in the parking lots of Les Pesqueres during the summer season, in addition to the fact that the track to P15, with several km of dirt, can become very heavy.

Approach: (machine translated)
From the parking P15 we take the PR (white and yellow marks) towards Mola de Lino.
After approximately 25 minutes of ascent, and with the ravine open to our left, we will see a descending path that emerges from the PR (mark X wrong direction) in a right turn.
We follow the path through bushes that in a few minutes leads to the small dry riverbed of our ravine.

Tour: (machine translated)
Aesthetic beginning between blocks, it is boxed in its middle part and ends with a waterfall behind the only pool.

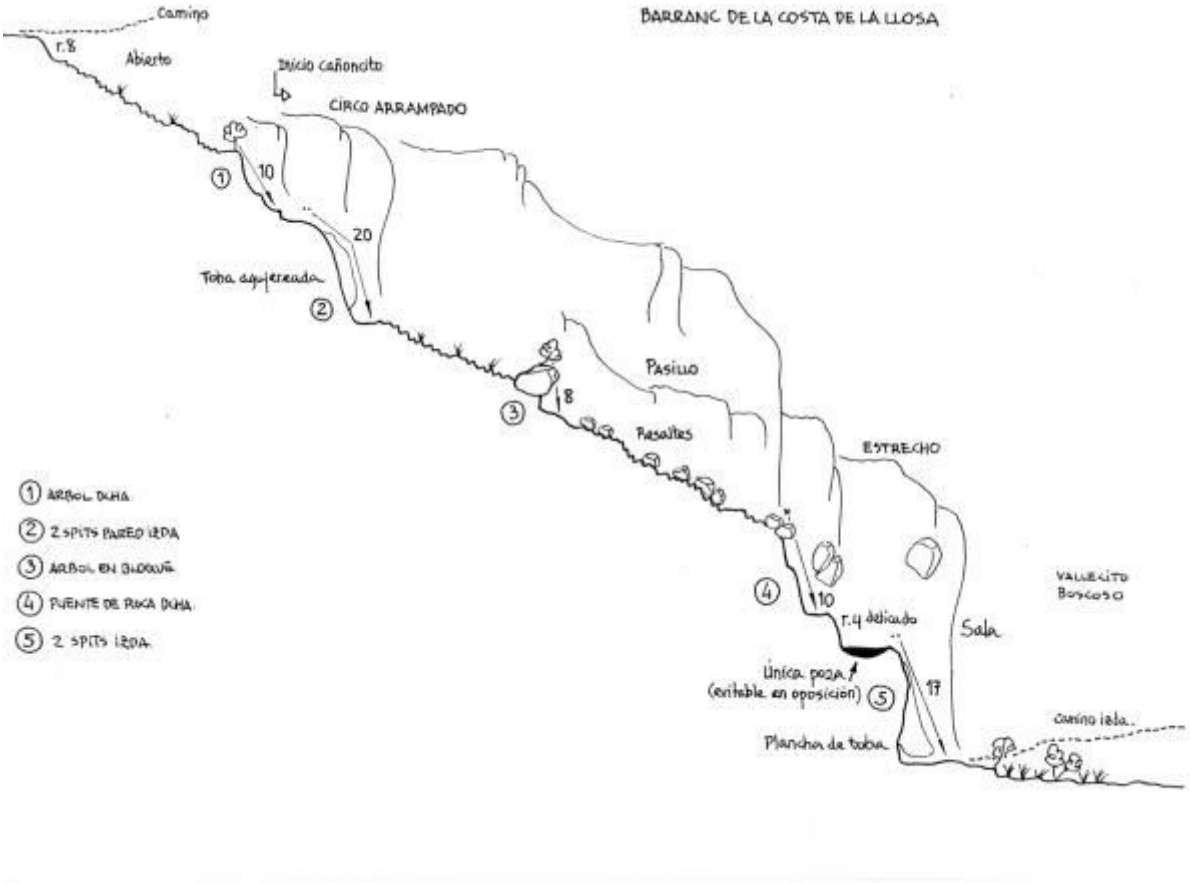

Return: (machine translated)
A road to the left difficult to follow but in 10 min. it leaves you at the car. If you don't ride through

Coordinates:
Canyon Start 40.8137 0.2517
Canyon End 40.8144 0.2489
Unknown Parking 40.8130 0.2448
