Country: Österreich / Austria Region: Salzburg Subregion: Bezirk Salzburg-Umgebung Town: Faistenau		
Difficulty: not as difficult	Grading: v1 a3 III	Total time: 3h15
Approachtime: 10min	Tourtime: 3h	Returntime: 5min
Altitude entry: 680m	Altitude exit: 580m	Delta Altitude: 100m
Canyon length: 1400m	Highest rapell: 8m	Amount rapells: 1
Transport: Car required	Rock type:	drainage area: km²
Season:	Orientation: Southwest	Best Time:
Rating: ★ 3.7 (12)	Info: ★ 2.9 (8)	Belay: ★ 2.7 (10)
Warnings: <i>Rockfall</i> On July 24, 2024, a large rockfall occurred at the first high jump (now downclimb). Further rockfall cannot be ruled out. inactive: <i>Ebenau road closed (22.07.24 - 07.09.24)</i> Dear canyoneers, just for your information: the road above the Strubklamm (Sbg) is closed until September 7th (except for local residents) due to road widening. Access to the entry is possible via Faistenau, for example. LG Tom		
Specialities:		
Gear: Ropes: 1x20m		
Summary: (machine translated) Deeply cut and year-round water-bearing canyon; very entertaining long tour; protection by dam; several swimming sections; different heights of jumps possible; good physical condition required! in several places rockfall danger; emergency exit in the middle section.		
Hydrology:		
Access: (machine translated) Coming from Hallein on the WiestalBundesstraße drive in the direction of Ebenau. Shortly after the Wiestalstausee comes on the right side the company "glass and frame" about 200m after the company comes a right. a parking possibility before a barrier, park here shuttle car (do not park on the bike path!!!) --> then follow the highway for about 1.3km to the junction Hintersee. Follow the narrow Hinterebenau road on the right past the Felbertauern school in the direction of Hintersee until you reach the "Seewirt" inn. Approx. 50m before the inn, a small road goes down to the right (180° bend) to the dam parking lot --> park here. Tip: Stop at the Obermayr inn or the Seewirt inn. Both also offer tours/rental material.		
Approach: (machine translated) From the parking lot, cross the dam wall to the ortographic left. Here you follow the forest road on the right for a short distance until a small path branches off on the right. The path then leads to a steep secured place with old iron ladder --> here is the entry (loose rock in the ladder area!!!). Alternative access: do not go over the dam wall but follow a small steep path right next to the dam wall down. Then cross the dam outlet and you are in the stream.		

Tour: (machine translated)

The Strubklamm is a canyoning tour for people who like jumping and being in the water. Prerequisites for the long aquatic tour are a good physical condition and appropriate equipment--> it is one of the most beautiful hiking, jumping and swim canyons in Salzburgerland with countless jumps in partly deep pools. In the higher parts it is also possible to rappel. In the middle section there is an emergency exit on the right (secured with traversese ropes) that leads up a steep slope to the road (about 50m before the rock tunnel). Towards the exit (before the canyon opens) there is a nice waterfall from the left side of the canyon, where some canyoneers have a massage--> rappel is not necessary for experienced jumpers, but a rope (20m) should always be carried.

Return: (machine translated)

Exit on the right after the bridge --> return on the right via the forest path to the road --> shuttle from the lower parking lot (by car or bike) to the dam parking lot.

Photo 1: Former jump site destroyed by the rockfall (Attention! Water is not deep!) Photo 2: Water volume reservoir Photo 3: High jump (approx. 8.5m) Photo 4: Waterfall / last inflow As always very beautiful and absolutely worthwhile, especially in the current heat a great way to cool off. Water is very refreshing, no running water at first, but after a short time everything is perfect. Very beautiful play of colors in the sunshine. The consequences of the rockslide are clearly visible, but don't make the canyon any less attractive - there are still plenty of possible jumps. One fixed rope is broken, so I recommend having at least a 10m rope with you, a $\geq 19\text{m}$ rope is needed to control the pool at the 8.5m jump (machine translated)

2025-06-21 | Zarnitz | ★★★★★ | 📖 | ⚓★★★★ | 🌊 Normal | 🟢 Completed

Mega beautiful! Built-in ropes partly only single threads. All jumps possible. (machine translated)

2025-05-09 | Joey CIA | ★★★★★ | 📖 | ⚓★★ | 🌊 Normal | 🟢 Completed

Good water level, some stands were loose and were tightened again. No more possible jumps at the former large pool after the rockfall. Pool fills up but very blocked. 2 abseiling options. Rope traverses need to be replaced. In general, some parts are more graveled but everything is jumpable after inspection. (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Strubklamm The nice canyon is full of swimming (long swim). From last year, some stones fell - but the jumps are still possible. Just be careful where you jump - always check the height of the water. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21833/observations.html>)

2024-09-08 | Giga | ★★★★★ | 📖★★★★ | ⚓★★★★ | 🌊 Normal | 🟢 Completed

As described: quite cold. All jumps feasible, some fixed ropes. The road was no longer closed, the construction site was still there. (machine translated)

2024-09-01 | GeorgB | ★★★★★ | 📖★★★★ | ⚓★★★★ | 🌊 Normal | 🟢 Completed

Water quality OK and cool. Too bad that the landslide had to be right next to the beautiful jump. Road still closed until 6.9 according to signs (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Strubklamm A pretty canyon with some quite long swims. All jumpable. It is rigged due to local canyoning school so easy to access jumps, and abseil even if you forgot your rope. The long swims mean you do need a decent wetsuit to avoid getting cold in the later sections (3/4mm well-fitting worked for me). Water from inlets in the upper half was _much_ colder than the water in the canyon so you get 'cold patches' afterwards. The fun jumps are a bit more spread-out than is ideal, but it's a great introductory canyon with no real dangers. The shuttle-road was closed so you have to go quite a long way round. Not clear if this is permanent. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21833/observations.html>)

2024-07-26 | Corina | 📖 | ⚓ | 🌊 Normal | 🟢 Completed

From July 24 to 25, 2024, there was a large rockfall in the upper parts of the Strubklamm gorge (first high jump) (machine translated)

2024-06-30 | Bernhard | ★★★★★ | 📖★★★★ | ⚓★★★★ | 🌊 Normal | 🟢 Completed

Cloudy, unclean water Slippery, cold Superiore jumps up to 17m (everything jumpable, no need for ropes) (machine translated)

2024-06-12 | Christian Balla | ★★★★★ | 📖★★★★ | ⚓★★★★ | 🌊 Normal | 🟢 Completed

Water temperature is fresh. In the beginning, there is virtually no running water at the dam, but the inflows are increasing. Attention, road will be closed soon! <https://www.christian-balla.de/Strubklamm> (machine translated)

2023-09-02 | Joey CIA | ★★★★★ | 📖 | ⚓★★ | 🌊 Normal | 🟢 Completed

Everything okay, jumpable . Some rope railings belong exchanged (machine translated)

2023-08-26 | Rok | ★★★★★ | 📖★★★★ | ⚓★★★★ | 🌊 Normal | 🟢 Completed

Beautifully rinsed by yesterday's rain. All jumps doable, no rope required. Have made today the 16 m jump (jump-off point is oro right at the S8, at the picture was jumped the S8. The jump-off point for the S16 is on the top left of
