<b>Warnings:</b> <i>Rockfall</i> On July 24, a large rockfall occurred at the first high jump (now a downclimb). Further rockfall cannot be ruled out. <b>inactive:</b> <i>Ebenau road closed (22.07.24 - 07.09.24)</i> Dear canyoneers, just for your information: the road above the Strubklamm (Sbg) is closed until September 7th (except for Anreiner) due to road widening. Access to the entry is possible via Feistenau, for example. LG Tom		
<b>Specialities:</b>		
<b>Gear:</b> Ropes: 1x20m		
<b>Summary:</b> (machine translated) Deeply cut and year-round water-bearing canyon; very entertaining long tour; protection by dam; several swimming sections; different heights of jumps possible; good physical condition required! in several places rockfall danger; emergency exit in the middle section.		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) Coming from Hallein on the WiestalBundesstraße drive in the direction of Ebenau. Shortly after the Wiestalstausee comes on the right side the company "glass and frame" about 200m after the company comes a right. a parking possibility before a barrier, park here shuttle car (do not park on the bike path!!!) --> then follow the highway for about 1.3km to the junction Hintersee. Follow the narrow Hinterebenau road on the right past the Felbertauern school in the direction of Hintersee until you reach the "Seewirt" inn. Approx. 50m before the inn, a small road goes down to the right (180° bend) to the dam parking lot --> park here. Tip: Stop at the Obermayr inn or the Seewirt inn. Both also offer tours/rental material.		
<b>Approach:</b> (machine translated) From the parking lot, cross the dam wall to the ortographic left. Here you follow the forest road on the right for a short distance until a small path branches off on the right. The path then leads to a steep secured place with old iron ladder --> here is the entry (loose rock in the ladder area!!!). Alternative access: do not go over the dam wall but follow a small steep path right next to the dam wall down. Then cross the dam outlet and you are in the stream.		
<b>Tour:</b> (machine translated) The Strubklamm is a canyoning tour for people who like jumping and being in the water. Prerequisites for the long aquatic tour are a good physical condition and appropriate equipment--> it is one of the most beautiful hiking, jumping and swim canyons in Salzburgerland with countless jumps in partly deep pools. In the higher parts it is also possible to rappel. In the middle section there is an emergency exit on the right (secured with traverseropes) that leads up a steep slope to the road (about 50m before the rock tunnel). Towards the exit (before the canyon opens) there is a nice waterfall from the left side of the canyon, where some canyoneers have a massage--> rappel is not necessary for experienced jumpers, but a rope (20m) should always be carried.		

**Return:** (machine translated)

Exit on the right after the bridge --> return on the right via the forest path to the road --> shuttle from the lower parking lot (by car or bike) to the dam parking lot.

**Coordinates:**

Canyon Start [47.7754 13.2093](#)

Canyon End [47.7673 13.1840](#)

Parking at Exit [47.7697 13.1816](#)

Intermediate Canyon Exit [47.7738 13.1978](#)

## Reports:

2024-10-21 | System User | |📖|📍|🌊 Normal |👍 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Strubklamm The nice canyon is full of swimming (long swim).From last year, some stones fell - but the jumps are still possible. Just be careful where you jump - always check the height of the water. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21833/observations.html>)

2024-09-08 | Giga |★★★★☆|📖★★★★|📍★★★★|🌊 Normal |👍 Completed

As described: quite cold. All jumps feasible, some fixed ropes. The road was no longer closed, the construction site was still there. (machine translated)

2024-09-01 | GeorgB |★★★★☆|📖★★★★|📍★★★★|🌊 Normal |👍 Completed

Water quality OK and cool. It's a shame that the landslide has to be right next to the beautiful jump. (machine translated)

2024-08-07 | System User | |📖|📍|🌊 Normal |👍 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Strubklamm A pretty canyon with some quite long swims. All jumpable. It is rigged due to local canyoning school so easy to access jumps, and abseil even if you forgot your rope. The long swims mean you do need a decent wetsuit to avoid getting cold in the later sections (3/4mm well-fitting worked for me). Water from inlets in the upper half was \_much\_ colder than the water in the canyon so you get 'cold patches' afterwards.The fun jumps are a bit more spread-out than is ideal, but it's a great introductory canyon with no real dangers.The shuttle-road was closed so you have to go quite a long way round. Not clear if this is permanent. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21833/observations.html>)

From July 24 to 25, 2024, there was a large rockfall in the upper parts of the Strubklamm gorge (first high jump) (machine translated)

2024-06-30 | Bernhard |★★★★|📖★★★★|📍★★★★|🌊 Normal |👍 Completed

Cloudy, unclean water Slippery, cold Superiore jumps up to 17m (everything jumpable, no need for ropes) (machine translated)

2024-06-12 | Christian Balla |★★★★☆|📖★★★★|📍★★★★|🌊 Normal |👍 Completed

Water temperature is fresh. In the beginning, there is virtually no running water at the dam, but the inflows are increasing. Attention, road will be closed soon! <https://www.christian-balla.de/Strubklamm> (machine translated)

2023-09-02 | Joey CIA |★★★★|📖|📍★★★★|🌊 Normal |👍 Completed

Everything okay, jumpable . Some rope railings belong exchanged (machine translated)

2023-08-26 | Rok |★★★★☆|📖★★★★|📍★★★★|🌊 Normal |👍 Completed

Beautifully rinsed by yesterday's rain. All jumps doable, no rope required. Have made today the 16 m jump (jump-off point is oro right at the S8, at the picture was jumped the S8. The jump-off point for the S16 is on the top left of the picture). The fixed rope to reach this S16 has a complete sheath crack. Other fixed ropes and handlines are not the best anymore. But they still work. (machine translated)

2023-07-15 | Patrick Summerer |★★★★|📖★★★★|📍★★★★|🌊 Normal |👍 Completed

Have needed with 5 experienced people only 2h 15min. Partly already many algae due to warm water and little throughput. Perfect as an after work tour on hot days (machine translated)
