Country: España / Spain Region: Aragón Subregion: Huesca Town: Bielsa		
Difficulty: a little difficult	Grading: v4 a3 II	Total time: 2h15
Approachtime: 35min	Tourtime: 1h30	Returntime: 10min
Altitude entry: 1300m	Altitude exit: 1200m	Delta Altitude: 100m
Canyon length: 300m	Highest rapell: 20m	Amount rapells: 6
Transport:	Rock type:	Drainage area: km ²
Season: June - November	Orientation:	Best Time:
Rating: ★ 3.4 (2)	Info: ★ 0 ()	Belay: ★ 2 (1)
Specialities:		
Gear:		
Summary: (machine translated) The Ordiceto or Urdiceto ravine rises from the lake of the same name at an altitude of more than 2000m from the snow accumulated in its glacial cirque. This gives it a permanent and very cold flow that, in case of entering it with high flow, can give us a scare in its fattened area for its dangerous water movements. Well formed descent that, in spite of the high flow, does not allow us to make jumps. A very close and easy access, as well as an almost immediate return to get into this short but unbeatable descent.		
Hydrology:		
Access: (machine translated) We have to go to Parzán, for this we arrive at Ainsa and take the A138 towards France. After passing Bielsa we arrive at Parzán and shortly after passing the pk 84 we see the sign "Urdiceto lake". We take this forest track that crosses the river Barrosa. We parked on the esplanade on the other side of the river, there is currently a company of guides (Impande Guías).		
Approach: (machine translated) We continue along the forest track ascending towards Urdiceto lake. Two sharp bends will raise us above the valley and then another to the left takes us into the valley of Urdiceto. In the sharp bend to the left we see a meadow with beehives and a path. We pass the beehives and soon we enter the ravine.		
Tour: (machine translated) Gully to evaluate very well the flow because in the fattened zone it has a lot of movement. Very slippery and cold		
Return: (machine translated) After the last rapel we exit to the right to the meadow. We cross it and reach the car.		
Coordinates: Canyon Start 42.6676 0.2212 Canyon End 42.6686 0.2175 Unknown Parking 42.6732 0.2152

A short canyon that can be easily combined with Barrosa and Trigoniero. Short, pretty and never boring, but cold water. (machine translated)

Info: 1/Agosto/2009 (ENRIQUE SALAMERO)

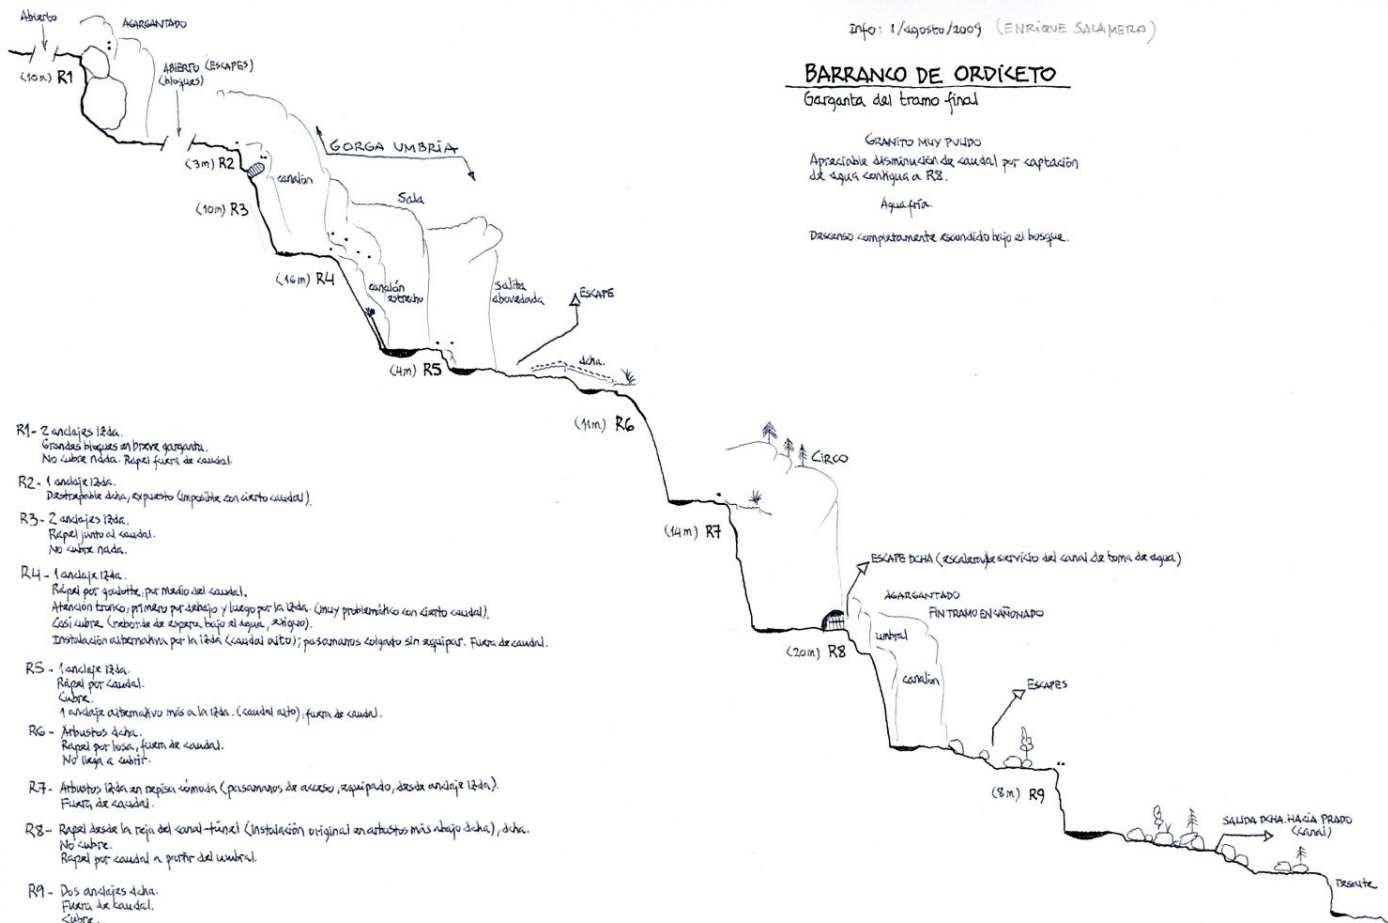

BARRANCO DE ORDÍKETO

Garganta del tramo final

GRANITO MUY PUÑO
Apreciable disminución de caudal por captación de aguas contiguas a R8.

Aguafría

Diseño completamente escondido bajo el bosque.

- R1 - 2 anclajes ldrá.
Gravados huecos en Dobre garganta.
No cubre nada. Rapel fuera de caudal.
- R2 - 1 anclaje ldrá.
Desapropiable dcha, espuesto (imposible con cierto caudal).
- R3 - 2 anclajes ldrá.
Rapel junto al caudal.
No cubre nada.
- R4 - 1 anclaje ldrá.
Rapel por gubirte, por medio del caudal.
Atención tranco, primero por debajo y luego por la ldrá. (muy problemático con cierto caudal).
Casi cubre. (reborde de abogara bajo el agua, antiguo).
Instalación alternativa por la ldrá (caudal alto); pasamanos colgado sin equipar. Fuera de caudal.
- R5 - 1 anclaje ldrá.
Rapel por caudal.
Cubre.
1 anclaje alternativo más a la ldrá. (caudal alto) fuera de caudal.
- R6 - Arbuños dcha.
Rapel por ldrá, fuera de caudal.
No llega a cubrir.
- R7 - Arbuños ldrá en región sombreada (pasamanos de acceso, equipado, desde anclaje ldrá).
Fuera de caudal.
- R8 - Rapel desde la rija del canal-troncal (instalación original en arbuños más abajo dcha), dcha.
No cubre.
Rapel por caudal a partir del lumbra.
- R9 - Dos anclajes dcha.
Fuera de caudal.
Cubre.
