**Country:** Schweiz / Switzerland **Region:** Kanton Graubünden **Subregion:** Region Imboden **Town:** Flims

**Difficulty:** difficult

**Grading:** v5 a4 IV

**Total time:** 6h25

**Approachtime:** 2h15

**Tourtime:** 3h30

**Returntime:** 40min

**Altitude entry:** 2120m

**Altitude exit:** 1880m

**Delta Altitude:** 240m

**Canyon length:** 1200m

**Highest rapell:** 51m

**Amount rapells:**

**Transport:** on Foot

**Rock type:**

**Drainage area:** 3.60km<sup>2</sup>

**Season:** August - October

**Orientation:**

**Best Time:**

**Rating:** ★ 4 (1)

**Info:** ★ 0 ()

**Belay:** ★ 0 ()

**Specialities:**

**Gear:**

**Summary:** (machine translated)

High alpine rappel canyon, carved by glacial water. 2 parts, each also independently accessible.

**Hydrology:**

**Access:** (machine translated)

Same approach as to Lavadignas and Surcruns: From Chur we drive via Trins-Mulins to Flims. There we take the road to the right uphill towards Fidaz and Bargis almost at the beginning of the village. After passing Fidaz, we come to a large parking lot where we park our car (1245m altitude). We continue up to Bargis either by bus, by bike or on foot (about 1 hour). See also in photo gallery Lavadignas.

**Approach:** (machine translated)

Once in Bargis (1550m altitude), we follow the road over the Turnigla bridge and then take the track up to a hut at 1860m altitude (up to here without any problems, even with a mountain bike, which would then be ready again immediately on the exit). From here we take the path further uphill, cross the stream from the Surcruns canyon a little later and then ascend in serpentines, always staying on the orographic left side of the stream, initially to an altitude of around 2040m. Here the path forks. On the left, a branch walks towards the stream and crosses it on a bridge. If we walked here, we would reach the middle entry point at a bridge at an altitude of 2000m via an alpine pasture. However, if we have chosen the upper entry, we continue on the right branch up the orographic left hand of the Val Camutschera (as on the access to Surcruns). At an altitude of 2106m we come to a fork again. The access to Surcruns leads straight north uphill here, but we go left and cross the stream. At an altitude of 2170m we also come to an alpine pasture. Here we leave the path to the left and follow a track that descends slightly towards the streambed of the Aua Tschanonca. At a suitable point, we descend into the streambed without a path. If we only have the lower - more interesting - parts in mind for an ascent, an access option has already been described above. According to the available topo map, however, it is apparently also possible to ascend from the end of the valley on the orographic left slope of our canyon and thus reach the mentioned bridge at 2000m altitude at the access point for the lower part (see maps in photo gallery).

**Tour:** (machine translated)

In the first part 6-8 smaller rappels, partly in the beam, plus downclimbs and also walking passages. The second part begins under the stone arch bridge with a few possible jumps and 4 smaller rappels before you reach the 75m drop which, together with the neighboring canyon that joins here, forms the "Cathedral of Bargis". After a changeover, there is still a 51m rappel. Then the descent comes to an exit.

**Return:** (machine translated)

First downstream, best along the left edge of the stream, then left out onto the path and down to Bargis

**Coordinates:**

Canyon Start [46.8855 9.2749](#)

Canyon End [46.8851 9.2919](#)

Parking Entry and Exit [46.8454 9.3208](#)

Alternative Canyon Start [46.8856 9.2846](#)
