Country: Italia / Italy Region: Piemonte Subregion: Verbano-Cusio-Ossola Town: Maglioggio		
Difficulty: difficult	Grading: v5 a2 IV	Total time: 4h40
Approachtime: 35min	Tourtime: 4h	Returtime: 5min
Altitude entry: 870m	Altitude exit: 570m	Delta Altitude: 300m
Canyon length: 800m	Highest rapell: 55m	Amount rapells: 22
Transport: Car required	Rock type:	Drainage area: km ²
Season:	Orientation:	Best Time:
Rating: ★ 4.1 (15)	Info: ★ 2.7 (9)	Belay: ★ 2.5 (13)
Specialities: Dam,		
Gear: Ropes: 2x 60m		
Summary: (machine translated) Rappel canyon in granite below a water drainage. The highlight is the final waterfall - completely "invisible" from the outside due to the intersection.		
Hydrology:		
Access: (machine translated) From Domodossola northwards, bypass Crodo on the right on the through road and after the village turn right to Maglioggio. Cross the Fiume Toce and continue uphill. In the first hairpin bend to the right, you can turn left onto a dirt road to the stream. Park the (first) car there (other access to the exit described at CICA RUDE CLAN on the Internet). Take the second car up to Maglioggio. At the junction before the village, take the left-hand road to park if there is no free parking space in Maglioggio (approx. 17 km from Domodossola).		
Approach: (machine translated) From Maglioggio, follow the signs for Madonna del Ronco/Alpe Aleccio. You come to another road (closed to motor vehicles), follow it for a short distance, leave it to the left at a small chapel and later rejoin the small road. Follow it to a water drainage where you enter the Antolina (downclimb the ladder on the right).		
Tour: (machine translated) The canyon gradually becomes deeper and narrower until it exits with a 55m waterfall. The water falls down in a chute that is so narrow that you cannot see it from further out. Before the high bridge, there is an exit on the right up to the road. Slippery terrain.		
Return: (machine translated) Approx. 200 m after the last rappel (C 18) turn left out and to the car.		
Coordinates: Canyon Start 46.2344 8.3454 Canyon End 46.2326 8.3339 Parking at Entry 46.2303 8.3371 Parking at Exit 46.2317 8.3319

Automatisch importiert von Descente-Canyon.com für Canyon Antolina DC-. Equipment occasionally minimal but sufficient for this water level. There are some downclimbs without an anchor present that I wouldn't want to do in gros débit. Anchors ok, although not always easy to pull the rope - be smart! If you park at aval, there's a steep and quick shortcut to the bridge at 680m , just follow the 'cruppo' sign and the stone men. Not a very clear path but clear enough (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21383/observations.html>)

2026-06-13 | Daniele |★★★★☆|📖★★★★|📍★★★★|🌊 Normal |👍 Completed

A pleasant gorge with good access, though a couple of bypasses or shortcuts would help with the climb in a couple of spots. Water level was medium-low; unfortunately, a little past the halfway point, a dead roe deer made the water less than pleasant. From the bridge onward, however, human thoughtlessness is evident in the numerous pieces of trash. The final waterfall is beautiful; unfortunately, we later saw the new structures that allow for descent into the current. (machine translated)

Everything's in order, great canyon (machine translated)

2026-06-05 | System User | |📖|📍|🌊 Normal |👍 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Antolina Canyon très glissant attention! Quand vous voyez un point sur lunule a droite préférez plutot remonter et passer en rive gauche du canyon pour aller chercher un rappel tout droit car en rive droite il manquait un point nous avons du sauter avec tres peu d'eau dans la vasque de réception. À part ça l'équipement est correct. Dommage pour les déchets a la fin du canyon... le final est vraiment magnifique. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21383/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Antolina Assez glissant, le final est plutôt pas mal! Sinon RAS (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21383/observations.html>)

2026-05-20 | Enrico |★★★★☆|📖|📍★|🌊 Normal |👍 Completed

Canyon quite slippery especially in the initial part. Watch out for the first prominence after the entrance. We rappelled from a dry sapling on the right face downstream. Anchorages almost all in very good condition. Only a couple of anchorages where a bad spot and a good one, otherwise good. Nice fun canyon. Water nice and cold, but leaving around 12 noon we were fine. (machine translated)

2025-09-19 | Wolfgang |★★★★☆|📖|📍★★|🌊 Normal |👍 Completed

Nice tour that gets better and better. 1-2 hooks loose or worth replacing. Ideal on the NM after e.g. Isorno (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Antolina Debit DC-. N'a d'interet que pour sa partie finale (à partir du pont). Amont sans interet. Chaque relais necessite de faire attention (risque de blocage de corde, monopoint, relais chainé avec point branlant, amat d'arbre, etc.). Ne vaut pas sa note au dessus de 3 car tres incomplet. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21383/observations.html>)
