Summary: (machine translated)
Long and hard canyon in its route, 4kms between forests with waterfalls to climb or rappel, few facilities and a jungle environment.
To take into account, the openers already had a mishap in the descent and the rescue was complicated due to the orography and the thickness of the forest.
To be completed

Hydrology:

Access: (machine translated)
Along the AS15 that goes up the Narcea river.
Just in the p.k. 19 we have a bridge over the river Lleiroso, a few meters before there is a lay-by where to leave the car to return.
With the access car we go back a kilometer and a half to Soto de los Infantes to take the AS226 towards Salas, go up to Alto de Piedrafita and take the small road on the left towards La Espina/El Pevidal, pass by La Bouga and from there to Cueva e Idarga to go down to Rañadoiro. Just at the entrance there is a picnic area and parking area.

Approach: (machine translated)
We leave the road and its curve to the right and go down the street on the left, after 100m there is a track on the right that goes down to the river, soon the track ends and we will have to go down to the river.

Tour:

Return: (machine translated)
Immediately, we have the car on the bridge.
