Canyon length: 500m	**Highest rapell:** 35m	**Amount rapells:** 10
Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Beautiful and simple ravine in the surroundings of Anaga. Very grassy and after rains with water in the stream to enjoy the small waterfalls.
Inside the park of Anaga, check prohibitions.

Hydrology:

Access: (machine translated)
Situating us in the Anaga Park by the TF12, up to p.k. 20.9 right next to the turnoff to Taborno we have the picnic area Casa Carlos where we park the access vehicle.
If we have two vehicles we will take the detour to Taborno to go down a little more than three kilometers to a crossroads where we will continue to the right to Taborno and then another kilometer to a left curve, past this there is a small hole in which to leave the vehicle.

Approach: (machine translated)
Access bocs Toneleros and Ñameras
From the restaurant we follow the PR TF2 about 250m until we find a small path on our left through the forest that leads to a deposit, the Llano Frío, past there is a pipe and next to the first facility to descend.

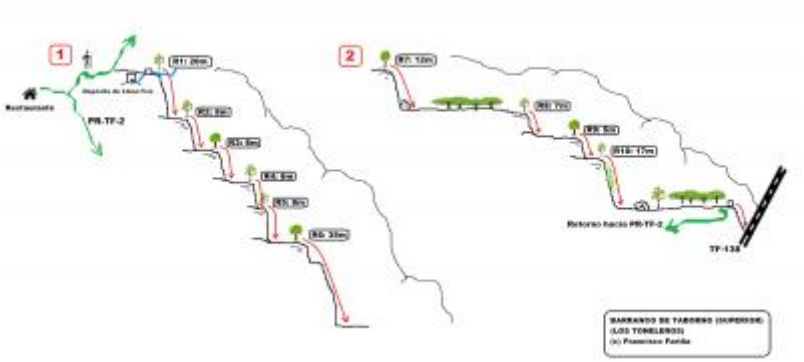

Tour: (machine translated)
See mole

Return: (machine translated)
After the last rappel we reach the road, we only have to go to the car.
If we only have one vehicle, before the last rappel we will go to the right to go up the slope to the PR, a steep climb of 100m of slope through the forest.
