Canyon length: 350m	**Highest rapell:** 30m	**Amount rapells:** 5
Transport:	**Rock type:**	**Drainage area:** km²
Season: March - November	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Simple and short channel next to the Pantà de Sallente, with water all year round and snow until well into spring, it is not of great interest but it is one more option in the Vall Fosca. Easy access and return, and many options to combine with other canyons in the area.

Hydrology:

Access: (machine translated)
On the N260 between Pont de Suert and La Pobla de Segur, at the height of Senterada we turn off on the L503 to the Torre de Cabdella. We will continue along the same road to the village of Cabdella, cross it, cross the Flamisell and continue along the road to the dam and cross it to park in the parking lot on the other side.

Approach: (machine translated)
Banks Ricossanto, Valldomars and Pigolo
We will leave in the direction of Estany Gento, quite steep path on the orographic left of the Canal de Pigolo, great views of the Vall Fosca, the cirque and the reservoir. We will climb a little more than 1 km to a milestone that marks the exit to the channel at about 1980m altitude. It can serve us as a reference that at this point a small tributary arrives on the left side.

Tour: (machine translated)
Continuous abseiling and abseiling to the bridge of the return trail.

Return: (machine translated)
When we reach the trail bridge, we turn left to go to the access trail and from there to the car.
