Nala int

Osogna Intermedio,Nala

Create: 2023-03-09 20:54:23	**Update:** 2026-08-08 11:07:49	**Print:** 2026-10-30 12:10:17
Country: Schweiz / Switzerland **Region:** Kanton Tessin / Cantone Ticino **Subregion:** Bezirk Riviera **Town:** Osogna		
Difficulty: a little difficult	**Grading:** v4 a4 IV	**Total time:** 7h20
Approachtime: 1h30	**Tourtime:** 5h30	**Returntime:** 20min
Altitude entry: 835m	**Altitude exit:** 460m	**Delta Altitude:** 375m
Canyon length: 1700m	**Highest rapell:** 36m	**Amount rapells:** 20
Transport: on Foot	**Rock type:** granite	**Drainage area:** 14.00km²
Season: June - September	**Orientation:** West	**Best Time:** 9-12 o'clock
Rating: ☆ 3.5 (12)	**Info:** ★ 2.7 (6)	**Belay:** ★ 2.4 (11)

Specialities:
Dam (inform operator), Dam (autom. flushing),

Gear:
Ropes: 2x40m

Summary: (machine translated)
Longer and more technical than the upper part.
Many angled and sometimes painful slides.

Hydrology: (machine translated)
If necessary, water supply from the interconnected reservoir canal leading to the power plant (automatic opening of the sluice in case of problems in the canal or in the power plant, as in the case of the accident in 2001: https://www.nzz.ch/article7KF2C-ld.179745).

Access: (machine translated)
As for Nala inferiore: from the freeway junction north of Bellinzona, take the N2 towards Biasca. Via Claro and Cresciano we arrive to Osogna (11,4 km from freeway to the bridge over the Nala). After the bridge over the Nala, drive up to the cemetery and leave the car there.

Approach: (machine translated)
Walk along the path above the parking lot towards the river and descend to the large final basin. Check the water flow, then cross the riverbed to the south and hike along the narrow mountain road to the beginning of the trail to Pönt and Valle di Osogna. After the steep climb to Pönt, the trail flattens out and then enters the Valle di Osogna. At the bridge at 839m the entry starts.

Tour: (machine translated)
Between C27 and C19 danger of falling rocks. Highlight of the part is the very narrow cut C23. If the water level is too high for tour participants, one must go through and below set up a rope ferry (then at least 35m of rope required, anchors are available).

Return: (machine translated)
Either exit to the right at the beginning of the Nala inferiore and go down the path to Osogna or continue down the Nala inferiore to its exit (see under "Nala inferiore").

Coordinates:
Canyon Start 46.3168 9.0098
Canyon End 46.3157 8.9921
Parking Entry and Exit 46.3146 8.9861

Some of the anchors and plates are still old! It would be a good idea to get some new rings. With Maria, Bogdan, and Markus (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Osogna (intermédiaire) DC, très beau et sauvage, mais un peu trop de marche selon moi.Très glissant par endroit et comme dit précédemment, attention au chutes de pierres (ce sont des gros!) (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22494/observations.html)

The water was beautifully clear and cold. It was a little slippery, but the slides were good. All the jumps would be doable. A lot of large rocks have recently come down, but they didn't damage anything important. (machine translated)

All the anchors are located in the middle section. Unfortunately, they're very slippery. All the slides are as slippery as an eel and therefore dangerous. (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Osogna (intermédiaire) DC, Très glissant, beaucoup de monopoint dans la première partie, pas forcement judicieusement placés, plusieurs rappels sur arbre. Cordée de 2, départ 13:00, sortie 17:00. Canyon alpin magnifique quoiqu'un peu long à mon goût ehe ! (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22494/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Osogna (intermédiaire) « Accès » en hélicoptère à 7h40. Le matin, il fait encore assez frais, l'eau est très froide, en particulier dans les bassins profonds. Au début de la descente, il y a peu d'eau, mais elle augmente progressivement au fil de la randonnée. La qualité de l'équipement est déplorable, on arrive certes à descendre, mais nous avons souvent eu l'impression d'avoir de la chance que les spits tiennent bon.4 heures à trois, l'un d'entre nous connaissait le canyon et l'emplacement des amarrages. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22494/observations.html)

2025-10-06 | Christian Balla | ☆ ☆ ☆ ½ | 🕮 | ⚓ ★ | ≋ Low | 👍 Completed
Followed up with the helicopter and then climbed the middle and lower parts. Anchoring in the middle part is inadequate, in the lower part mostly excellent (with a few exceptions). Approx. 6 hours in the canyon (both parts) with three of us, approx. 8 hours incl. reparking, flight, changing clothes. In the middle parts we only had shade, it was very fresh. (machine translated)
