Country: France **Region:** Occitanie **Subregion:** Pyrénées-Orientales **Town:** Thuès Entre Valls		
Difficulty: not as difficult	**Grading:** v3 a2 II	**Total time:** 1h40
Approachtime: 25min	**Tourtime:** 1h10	**Returntime:** 5min
Altitude entry: 870m	**Altitude exit:** 750m	**Delta Altitude:** 120m
Canyon length: 200m	**Highest rapell:** 35m	**Amount rapells:**
Transport: on Foot	**Rock type:**	**Drainage area:** km²
Season:	**Orientation:** North	**Best Time:**
Rating: ☆ 2.2 (5)	**Info:** ★ 1 (1)	**Belay:** ★ 2.3 (3)

Specialities:

Gear:

Summary: (machine translated)
Rappel canyon with hot water

Hydrology:

Access: (machine translated)
Leave the A-9 'la Languedocienne / la Catalane' (Montpellier-Barcelona) at exit 42 near Perpignan (Perpignan South) and a few km further north take the N-116 towards Prades. Drive past the town (52 km from the A-9) and after another 16 km through Olette. 4 km after Olette, cross the Têt to the orographic right. The thermal station of Thues-les-Bains, the starting point for the tour, is on the left and parking your vehicle here becomes a problem: either on the private grounds of the thermal station - only with the prior consent of the operators - or a few hundred meters up the valley in a parking bay on the edge of the D-116 (when walking back to the thermal station you can see the final waterfall from the D-116).\nParking on the D-116 is strictly prohibited in the vicinity of Thues-les-Bains! A recommended alternative is to take the 'train jaune' (yellow train). It runs through the entire Têt valley and also stops directly in Thues-les-Bains. In summer, riding in the open carriages is an experience in itself.

Approach: (machine translated)
From the bridge, the trail climbs slightly over the grounds of the thermal station up to the railroad station. Cross the tracks here. Immediately after the tracks, the path turns right and climbs gently and evenly up the slope above the tracks. You turn into the Fajet valley and soon reach the stream below a fenced-in water catchment.

Tour: (machine translated)
The Fajet is fed by numerous steaming thermal springs and the water has a temperature of 55° C in the pot under the 2nd abseil point. (especially for 'hot showers'!). You can only bathe here because cold water is supplied via a plastic pipe.

Return: (machine translated)
After crossing under the road, turn right and as soon as possible right up to D-916 (lean part of the stairs against the wall!).

Coordinates:
Canyon Start 42.5250 2.2463
Parking Entry and Exit 42.5288 2.2476
Canyon End 42.5280 2.2452
Waypoint 42.5279 2.2451
Parking Entry and Exit 42.5330 2.2491

Automatisch importiert von Descente-Canyon.com für Canyon Fajet & Eaux Chaudes Conditions parfaites. Après 3 jours de pluie, on avait peur de trouver de l'eau froide ou tiède, car trop mélangée, mais non, c'était juste idéal, de la première marmite très chaude, jusqu'à la dernière cascade de 40m tiède. Merci à Jérôme et Kévin de nous avoir répondu sur les conditions !Il y a 2 places devant l'entrée du bâtiment, on s'est garés le temps de faire 2 fois le canyon, et visiblement ça n'a gêné personne. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/230/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Fajet & Eaux Chaudes Fait tranquillement tout seul, l'eau est parfaite avec ces températures ni trop chaude ni trop froide sauf la première marmite qui était bouillante comme d'habitude (on y reste pas 5 minutes). C'était très agréable pour se reposer dans les vasques. Ramassage de déchets des personnes qui viennent la nuit se poser avec des bougies ! Je ne parle pas de notre communauté bien-sûr...(capsules de bières, mégots de cigarettes magiques, papiers...). Enfin bref insupportable. J'ai essayer même de décoller toute la cire de bougie par-ci par-là. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/230/observations.html)

The canyon itself is not very interesting. What is interesting are the side tributaries of warm water. It is very pleasant to warm up there. It is then all the colder to return to the main stream. The parking spaces along the road no longer exist. Only at 42.5330380N, 2.2490644E is there still a sensible place to park. (machine translated)
