Automatisch importiert von Descente-Canyon.com für Canyon Tsigenorema !5 anchors are missing, the descent is not recommend without an extensive experience in anchor building and alternative anchors setting. Bring a drill and 20 bolts for a safe descent ! (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21672/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Tsigenorema Beautiful canyon! However, as the report below says, 90% of the anchors are gone, it looks like flood damage. We did the full descent, improvising anchors as we went. A fun challenge but not for everyone. No running water but deep pools, some deep enough to jump, many swimmers. The canyon deserves re-bolting. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21672/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Tsigenorema Il y avait un peu de au au tout début puis rapidement quasiment à sec. On a du s’échapper du Canyon car dès le début de l’encaissement (vers 900m d’altitude) des points manquaient (peut être emportés par une crue ?), ce qui ne nous a pas donné confiance pour la suite. La réchappe était possible à ce moment là mais sacrément bourrine dans la végétation. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21672/observations.html)
