Altitude exit: 320m

Delta Altitude: 160m

Canyon length: 700m

Highest rapell: 24m

Amount rapells: 8

Transport: Car optional

Rock type: limestone

Drainage area: km²

Season: May - September

Orientation:

Best Time:

Rating: ★ 0 ()

Info: ★ 0 ()

Belay: ★ 0 ()

Specialities:

Gear:

Ropes: 2x30m

Summary:

Short route, but not without interest.

Hydrology:

Access:

reach Pisogne and park on Via Martiri delle Foibe at the intersection with Via delle Miniere, next to the bridge over the Trobiolo, where there are some free parking spaces. Leave a car here for the return, then drive up toward the locality of Terzana. After passing the hamlet of Pressò, park on the right in a small grassy turnout, just before a water intake with a fountain on the left (2.4 km).

Approach:

Walk uphill along the road to Terzana; after about 150 m, and after a hairpin bend on the right, follow a private road (blue sign: "Pisogne loc. Giacche") that leads to a house. Shortly before the house, go down to the right across the meadow to reach the streambed - 10 m (the owners are friendly; ask for permission).

Tour:

Escape routes: after the first rappel and the water intake on the orographic right, take the path that climbs back to the parking area or the tunnel on the left that leads to trail 209. Before the sixth vertical rappel of about 20 m, on the orographic left, you can also reach trail 209.

Anchors: stainless steel bolts 10x100 mm.
