If you are only doing Gavirolas, it is best to park at Alp Sura, otherwise as an integral with Fluaz at the reservoir below.

Approach:

Tour: (machine translated)
Very open at first and then suddenly some very narrow crevasses. Then very continuous and really beautiful towards the exit.

Automatisch importiert von Descente-Canyon.com für Canyon Gavirolas We hiked up to the start, but unfortunately it was too snowed in already. We walked along the edge until halfway to check if it got better, but it didn't. It might melt away again the coming days. Beautiful valley! Fifteen years after the first ascent, it was time to replace the old Raumer expedition hooks on the longer rappels with ring hooks. When climbing the Combo with Fluaz, the day, the team’s condition, and the water level still have to be just right—even though the time windows for an ascent are getting longer and longer. Not for late sleepers or wimps... Despite the low water level, the water was an extremely milky color. (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Gavirolas Enchainement Gavirolas + Fluaz en gros à très gros débit selon les critères DC. Eau laiteuse déjà à 7h30, on ne l'avait pas prévu mais cela n'a pas posé de problème sauf pour la progression car on ne peut pas anticiper la profondeur des vasques. Nous avons changé les plaquettes posées lors de la première descente par des plaquettes inox avec anneau. Il faut partir très tôt pour avoir le soleil tout le long des 2 canyons, les cascades finales de Fluaz perdent le soleil vers 12h30-13h. 4h45 dont 1h25 dans Gavirolas. Just such a great tour! I can't wait to combine it with Fluaz Inferiore. But the natural rock bridge at the C20 no longer exists. (machine translated)
