<b>Summary:</b> (machine translated) Jumping and rappel canyon with huge pools and a long hiking trail in an open environment. Cost: €4.50 per person. Registration at alpin-sport@tnr.at. See photos.		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) Coming from Füssen on the bypass road past Reutte, take the southern exit Reutte and turn left under the road to the Fernpaß, following the signs to Plansee, Linderhof Castle, Oberammergau. After approx. 2.5 km there is an unpaved parking lot for approx. 10 cars to the right of the road. Park your car here. This is also the starting point for the hike to the Zunkerkopf. To the left of the road, you will see a chapel at the edge of the forest, slightly elevated and partially obscured by bushes. Coming from Munich on the A95 towards Garmisch-Partenkirchen, turn off the B 2 (extension of the A 95) in Oberau towards Oberammergau. Take the B 23 through Ettal and approx. 600 m after the end of the village turn left onto the St 2060 in the direction of Linderhof Castle, Plansee, Reutte/Tyrol. Pass Linderhof and continue over the Ammersattel to Plansee. Along this and the following small Plansee, the road finally crosses the Archbach, the outflow of the lake. 800 m further on, the above-mentioned chapel is on the righthand side and after another 50-100 m the parking lot is on the left.		
<b>Approach:</b> (machine translated) From the parking lot, head first to the chapel. To the west (left of) the chapel, a path leads into the forest and down towards Archbach. After approx. 100 m, you come to the hiking trail coming from Reutte in the direction of Plansee. Follow this (to the right) to gain an insight into the open canyon and see the upper abseiling point above the large pool. A little further on, you come to a dam and enter the Archbach stream below (at 950 m).		
<b>Tour:</b> (machine translated) With a total duration of 2-2.5 hours (for 2 people), this is a half-day tour. For photos, an entry in the early afternoon is favorable, as then the sun (if available) shines on the waterfalls. The brave can dare a high jump (approx. 15m) from a ledge (after crossing) during the 2nd rappelling route. There are also transfer facilities here. As the name Stuiben Falls suggests, there are 2 waterfalls (approx. 25 m and 40 m), a few jumping pools and a flat, easy walk. The stream can also be walked further down to the E-Werk. To do this, take the path on the left bank. Where it rises, turn right into the stream. This is followed by a narrow section with a couple of jumping pools.		

**Return:** (machine translated)

Approx. 100m downstream after the large Stuibenthal (at 830m altitude), a small path leads up from the streambed on the left and after a few meters joins the hiking trail that we followed - further up - on the approach to the entry. Keeping to the left at a few forks, you will repeatedly gain views back into the canyon ascent. After reaching the starting height, where the path then runs level, we turn back onto the path to the chapel and reach the parking lot in a few minutes.

If you descend to the level of the E-Werk, turn left over the footbridge and continue to the parking lot exit.

Thanks to regulation, even after a lot of rain in recent weeks with normal water level and feasible without problems. Very well equipped, anchors for special individual rope courses can no longer be used, but still top equipped due to the large number of anchors. 4.50 per person, we were also able to pay by SEPA transfer. Additional costs for the upper parking lot: 6€/day. (machine translated)

Short but very worthwhile tour, perfect for cooling off on hot days. From the parking lot at the substation you need about 35min to the entrance, and the few jumps after the longer flat passage should be taken. (machine translated)

A canyon with slides and jumps to let off steam and have fun. The Stuibenthal Falls are a classic among the canyons near Reutte. There is probably always someone out and about here and access is regulated. It starts with a 5m jump. This is followed by a 25m high abseil. This is followed by another jump of approx. 4m. The highlight is an 18m+15m abseil, whereby the 15m are often also jumped. A jump at this height is not without risk! This is followed by another jump of about 5m. Recommendation: Get out now and return to the parking lot - alternatively, there are more jumps after a long run. The following applies to all jumps: Always check the depth of the water pools and possible obstacles with diving goggles beforehand!
