Summary: (machine translated)
55m waterfall , to which you can get through a short narrow passage

Hydrology:

Access: (machine translated)
We leave the N198 at Porto Vecchio in the direction of Zonza. After about 20 km on the winding D368 we come to the reservoir Lac de l'Ospedale. 900m after the exit of the dam is a parking lot with a few huts on the righthand side. Here we park the car. If we arrive from the direction of Bavella, Zonza, 13.5 km after Zonza (on the D368) we pass the new tourist starting point for a visit to Piscia di Gallu (large parking lot, etc.). Then, 2.4 km further, our parking place for the car is waiting.

Approach: (machine translated)
We take the - old - access path to the waterfall downhill, meet a small stream, climb again about 50m along a forest path and thus reach the plateau that lies above the waterfall. There we descend to the stream L'Osu and here we turn left to the beginning of the narrows.

Tour: (machine translated)
First, some smaller rappel in the narrow part at the beginning (possibly also jumpable/slideable after appropriate testing). Then we reach the pool above the high fall. Then the high fall (47m to the first impact at the foot of the fall), which is mastered on the left at the edge of the ray. At the bottom still a few meters downhill over slippery rocks.

Return: (machine translated)
From here, take the steep path on the left up to the plateau, and there keep left on the approach path back to the car.
