Country: Italia / Italy **Region:** Friuli Venezia Giulia **Subregion:** Udine **Town:** Amaro		
Difficulty: a little difficult	**Grading:** v4 a2 III	**Total time:** 2h45
Approachtime: 40min	**Tourtime:** 2h	**Returntime:** 5min
Altitude entry: 400m	**Altitude exit:** 260m	**Delta Altitude:** 140m
Canyon length: 1300m	**Highest rapell:** 52m	**Amount rapells:** 7
Transport: on Foot	**Rock type:**	**Drainage area:** 4.00km²
Season:	**Orientation:** Southeast	**Best Time:**
Rating: ☆ 3.6 (37)	**Info:** ★ 2.9 (31)	**Belay:** ★ 2.9 (34)

Specialities:

Gear:
Ropes: 2x60m

Summary: (machine translated)
A beautiful, open lime canyon that isn't too long; several walking and climbing sections; a 55-meter final waterfall (can be bypassed on the left via an emergency exit); beautiful pools with emerald-green water; good belay stations.

Hydrology:

Access: (machine translated)
From Tolmezzo take the SS52 main road towards Carnia --> after a long straight stretch you come to a highway bridge --> before the bridge turn left into the small side road --> here turn left along the road --> go under the bridge to the next bridge which you cross (exit Torrente Favarinis) --> park immediately on the right (gravel parking place) approx. 260m.

Approach: (machine translated)
From the parking lot, take the hiking trail (415) on the right for approx. 25 minutes up a steep incline to a ruin with a wooden bench at approx. 480m (see map). Follow the hiking trail for a very short time until you reach a tree with blue and red markings (left). Here you leave the main path and follow the marked path on the left for another 15 minutes (becomes increasingly steeper) to the entry at approx. 370m.

Tour: (machine translated)
Once in the streambed, you immediately start with the first abseiling point C16 (right/left) (chain anchor) in shallow pools --> jump or slide in deep pools --> short walking passages --> C28 (right) (chain anchor) or left (rope is required) --> bypass after the large rock block --> gorge becomes a little narrower --> short walking or abseiling passage in a narrow section of the gorge (very beautiful) --> after a large rock block --> bypass with a sling (rope is required, however). bypass, stand with sling (rope is required) --> canyon becomes somewhat narrower --> short walk, downclimb or jump passage in narrow canyon section (very beautiful) --> after the large boulder in the middle of the canyon and the 5 canyons in a row, the canyon turns right --> straight ahead and over a short downclimb to the next 15m step (this can also be downclimbed on the left) --> walk and climb --> narrow canyon section to an incised downclimb 16m chain anchor right/left (danger of swinging!) --> canyon opens and makes a bend to the right to a beautiful abseil (chain anchor left behind the rock), from the top right you can set up a rope traverse to the exposed chain anchor, then C25 in deep pools alternatively R30 top right. Possible jumps 6m, 10m and 12m (for the two higher ones you can climb up a little downstream to the right via a fixed rope) --> short walking and downclimbing passage --> short swimming section before the 50m final waterfall (!!! sharp edge)which exits in a large but shallow pool (here you can take the emergency exit on the left beforehand) 50m ropes are not enough, better 2x60m --> you can downclimb the gorge exit without any problems --> last jump 1m into a swimming pool.

Return: (machine translated)
Follow the mostly dry streambed for about 50m and then get off to the left before the bridge --> follow the small path to the parking lot.

Coordinates:
Canyon Start 46.3870 13.1131
Parking Entry and Exit 46.3849 13.1216
Canyon End 46.3851 13.1202

Everything's great. There's more water than in the past few weeks. The water is very yellowish because of the algae. I've never seen it like this before. (machine translated)

We hiked through the canyon at night from August 3 to August 4, using headlamps. The canyon is ideal for this. We started the access around 1 a.m. All belay stations were in good condition. (machine translated)

Very comfortable, safe and playful. Even though it looked emty at the entrance (comparing it to photos from others it really had less water as usual) all jumps were possible. The anchoring is 10/10. All in all Favarinis is pretty enjoyable canyon I would like to visit again.

Automatisch importiert von Descente-Canyon.com für Canyon Favarinis Peu d'eau. A faire après des orages !!! (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2599/observations.html)

2026-07-15 | Edgar Göhr | ☆ ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ ★ | 〰 Low | 👍 Completed
Rappel point No. 5: As mentioned several times before, given our low water level, it can be climbed down or bypassed on the left. (machine translated)

2026-07-10 | Marosffy Dániel | ☆ ☆ ☆ ½ |🕮 ★ ★ |⚓ ★ ★ | 〰 Low | 👍 Completed
Hardly any water but still flowing. Pools are OK.

2026-06-20 | Andi Schober | ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ ★ | 〰 Low | 👍 Completed
Low water level, which makes some areas quite slippery. Anchors are fine. (machine translated)

2026-06-04 | Uschi Winter | ☆ ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ | 〰 Low | 👍 Completed
Despite the rain the day before, there was surprisingly little water. The final pool at the exit has silted up. Too bad. Otherwise, everything's fine. (machine translated)

2026-05-13 | Montie | ☆ ☆ ☆ ½ |🕮 |⚓ ★ ★ ★ | 〰 Low | 👍 Completed
All good. Anchor no. 5 is often skipped which is why it is old and rusty and doesn't get replaced. No algae yet, jumps are possible.

2025-09-28 | Patrick Summerer | ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ | 〰 Normal | 👍 Completed
Stand no. 5 very rusty and should be replaced. A few nice jumps that glow a wonderful yellow-green in the sunshine! (machine translated)

2025-09-27 | Uschi Winter | ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ ★ | 〰 Normal | 👍 Completed
Everything was ok. Gladly again. Lots of algae. (machine translated)

Superiore set up! The final waterfall is a highlight! (machine translated)

2025-07-27 | GeorgB | ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ ★ | 〰 Normal | 👍 Completed
Everything ok, water level still high after thunderstorms yesterday but falling fast. The 12m jump is doable with soft knees (machine translated)

2025-07-25 | Péter Bonczi | ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ ★ | 〰 Normal | 👍 Completed
Equipment TOP. Lower normal water level. Algae formation has started. (machine translated)
