

Torrente Favarinis

Favarinis

Create: 2023-03-09 20:49:53	Update: 2025-06-12 08:12:51	Print: 2025-07-07 03:07:51
Country: Italia / Italy Region: Friuli Venezia Giulia Subregion: Udine Town: Amaro		
Difficulty: a little difficult	Grading: v4 a2 III	Total time: 2h45
Approachtime: 40min	Tourtime: 2h	Returntime: 5min
Altitude entry: 400m	Altitude exit: 260m	Delta Altitude: 140m
Canyon length: 1300m	Highest rapell: 50m	Amount rapells: 7
Transport: on Foot	Rock type:	drainage area: km ²
Season:	Orientation: Southeast	Best Time:
Rating: ★ 3.5 (21)	Info: ★ 2.9 (17)	Belay: ★ 2.9 (18)
Specialities:		
Gear: Ropes: 2x60m		
Summary: (machine translated) Beautiful, open, not too long lime canyon; several walking and climbing passages; 55m final waterfall (can be bypassed via emergency exit on the left); beautiful pools with emerald green water; good places to stand.		
Hydrology:		
Access: (machine translated) From Tolmezzo take the SS52 main road towards Carnia --> after a long straight stretch you come to a highway bridge --> before the bridge turn left into the small side road --> here turn left along the road --> go under the bridge to the next bridge which you cross (exit Torrente Favarinis) --> park immediately on the right (gravel parking place) approx. 260m.		
Approach: (machine translated) From the parking lot, take the hiking trail (415) on the right for approx. 25 minutes up a steep incline to a ruin with a wooden bench at approx. 480m (see map). Follow the hiking trail for a very short time until you reach a tree with blue and red markings (left). Here you leave the main path and follow the marked path on the left for another 15 minutes (becomes increasingly steeper) to the entry at approx. 370m.		
Tour: (machine translated) Once in the streambed, you immediately start with the first abseiling point C16 (right/left) (chain anchor) in shallow pools --> jump or slide in deep pools --> short walking passages --> C28 (right) (chain anchor) or left (rope is required) --> bypass after the large rock block --> gorge becomes a little narrower --> short walking or abseiling passage in a narrow section of the gorge (very beautiful) --> after a large rock block --> bypass with a sling (rope is required, however). bypass, stand with sling (rope is required) --> canyon becomes somewhat narrower --> short walk, downclimb or jump passage in narrow canyon section (very beautiful) --> after the large boulder in the middle of the canyon and the 5 canyons in a row, the canyon turns right --> straight ahead and over a short downclimb to the next 15m step (this can also be downclimbed on the left) --> walk and climb --> narrow canyon section to an incised downclimb 16m chain anchor right/left (danger of swinging!) --> canyon opens and makes a bend to the right to a beautiful abseil (chain anchor left behind the rock), from the top right you can set up a rope traverse to the exposed chain anchor, then C25 in deep pools alternative R30 up right --> short walking and climbing passage --> short swim before the 50m final waterfall (!!!! sharp edge) which exits in a large but shallow pool (here you can take the emergency exit on the left beforehand) 50m ropes are not enough, better 2x60m --> you can downclimb the gorge exit without any problems --> last jump 1m into a swimming pool.		
Return: (machine translated) Follow the mostly dry streambed for about 50m and then get off to the left before the bridge --> follow the small path to the parking lot.

Parking Entry and Exit [46.3849 13.1216](#)

Canyon End [46.3851 13.1202](#)

Reports:

2025-06-11 | Uschi Winter | ★★☆☆ | 📖★★★★ | ⚓ | 🌊 Normal | 🟢 Completed

Last waterfall: 50 meters ... we used 60. In our opinion, 50 is too short. See also comment from 3.7.24 and 15.6.24 . All rappels to aic are ok and are all accessible without traverse rope. (machine translated)

2025-04-04 | Péter Bonczi | ★★☆☆ | 📖★★★★ | ⚓★★★★ | 🌊 Normal | 🟢 Completed

Everything is fine. (machine translated)

2025-03-11 | Rick Paapy | ★★☆☆ | 📖★★★★ | ⚓★★★★ | 🌊 Normal | 🟢 Completed

Everything perfect! Nice flow after the rain.

2025-02-22 | Horst Lambauer | ★★☆☆ | 📖★★★★ | ⚓★★★★ | 🌊 Low | 🟢 Completed

everything tip top (machine translated)

2024-10-24 | Péter Bonczi | ★★☆☆ | 📖★★★★ | ⚓★★★★ | 🌊 Normal | 🟢 Completed

Super conditions. Good water flow. Equipment ok. (machine translated)

2024-10-04 | Jason Walker | 📖 | ⚓ | 🌊 High | 🚫 Not done

I suspect that this is the upper limit of the canyon without lingering psychological trauma afterwards! Yesterday, there was about 1/2 as much water, and we suspected double the flow would be okay. Photo from the takeout.

2024-10-03 | Jason Walker | ★★☆☆ | 📖 | ⚓★★★★ | 🌊 Normal | 🟢 Completed

Despite most other canyons locally being too high for us to attempt, this was probably only at about medium water level, and could probably take double the water in the photo of the bottom fall (you have to walk through water to check it from the carpark).

2024-10-01 | Manuel Reindl | ★★☆☆ | 📖★★★★ | ⚓★★★★ | 🌊 Normal | 🟢 Completed

Very good conditions in the canyon. Top stands and perfect water. (machine translated)

2024-09-11 | Johannes Hofbauer | ★★☆☆ | 📖★★★★ | ⚓★★★★ | 🌊 Normal | 🟢 Completed

Superiore protection, all anchors and belays are in excellent condition. (machine translated)

2024-08-28 | Florian Heufler | ★★☆☆ | 📖★★★★ | ⚓★★ | 🌊 Low | 🟢 Completed

All anchors ok, jumps all doable, as others already described a lot of algae in the water. (machine translated)

2024-08-26 | Montie | ★★☆☆ | 📖★★★★ | ⚓★★★★ | 🌊 Low | 🟢 Completed

Definitely still low-water conditions, with a lot! of algae, especially at the beginning. After the start it becomes a bit less and it doesn't really bother you anymore. Some nice rappels, a few jumps, anchors are all great. Not quite as beautiful as others in the vicinity but still nice and rewarding. Would repeat.

2024-08-12 | Jason Walker | ★★☆☆ | 📖 | ⚓★★★★ | 🌊 Low | 🟢 Completed

Very very low water. The canyon is still wet, but you would not call it aquatic - more like abseiling in the rain! Still a few jumps to do though :) Quite a lot of gravel throughout.

2024-08-04 | Thomas Fras | ★★☆☆ | 📖★★★★ | ⚓★★★★ | 🌊 Low | 🟢 Completed

Currently a lot of gravel and algae accumulation in the canyon (machine translated)
