Summary: (machine translated)
Uninterrupted succession of waterfalls up to the road.

Hydrology: (machine translated)
Low water level, small catchment area, only accessible during the rainy season when water is flowing. However, to be avoided when it rains, as there is a considerable risk of falling rocks in the boulder field.

Access: (machine translated)
From Cilaos, take the D242 in the direction of Ilet à Cordes.
Cross the bridge at the exit of the Ravine Gobert canyon (sign on the bridge) and continue for 150 m to park in a small parking lot (2 spaces) at the next canyon (Ravine Coin).

Approach: (machine translated)
From the parking lot, walk about ten meters upstream of Ravine Coin to the bridge, where you will find a steep uphill trail. This leads to a better marked trail that goes up to a ridge between Gobert and Coin (the same trail as to Ravine Coin Sup). The steep path continues towards Ravine Coin. 40 m before you reach the entrance to this canyon, at the height of a fallen tree, continue straight up through the undergrowth. The path is no longer visible, but the rest of the route is logical.

Once you reach a vegetation-free, sandy slope (view of Ravine Gobert), you must descend the small ridge on the right (be careful, it is slippery) towards Ravine Gobert, pass a first dry canyon, cross it and continue horizontally until you reach a second dry canyon. Continue horizontally, without trying to ascend, until you finally reach the beginning of the canyon.

Tour: (machine translated)
Uninterrupted sequence of waterfalls up to the road. First in a relatively open area, then the large waterfall that stretches down over two pitches (beware of falling rocks), then passage along a huge boulder field (dangerous in the rain) and finally the last narrow section in better rock.

Return: (machine translated)
Go back onto the bridge in RG and follow the road 150 m to the Ravine Coin parking lot.
