Country: Italia / Italy **Region:** Veneto **Subregion:** Belluno **Town:** Mel		
Difficulty: a little difficult	**Grading:** v4 a3 III	**Total time:** 3h55
Approachtime: 15min	**Tourtime:** 3h20	**Returntime:** 20min
Altitude entry: 600m	**Altitude exit:** 340m	**Delta Altitude:** 260m
Canyon length: 4600m	**Highest rapell:** 60m	**Amount rapells:** 3
Transport: Car required	**Rock type:** limestone	**Drainage area:** km²
Season: March - October	**Orientation:** North	**Best Time:** 11-14 o'clock
Rating: ☆ 3.3 (2)	**Info:** ★ 2.5 (2)	**Belay:** ★ 2 (3)

Specialities:

Gear:
Ropes: 2x60, 1x30

Summary: (machine translated)
The same stratified limestone as in the neighboring canyons, but in a long, wild, partially broken down version. A short vertical part includes a sporty c30 followed by a c60. Long walking sections in a rocky riverbed are rewarded with multiple narrows. High chances of rockfall.

Hydrology:

Access: (machine translated)
From Belluno on the SP1 via Limana and Trichana to Mel, continue on the SP1 for another 1.8 km (17.3 km from Belluno to the junction at the traffic circle), then turn left uphill to Villa di Villa (360 m altitude). Continue up the road to the bridge over the next stream, the one from Val d'Arc. Park the car here for the exit (5.4 km from the traffic circle on the SP1 - 380 m altitude). We continue uphill in the second car. Finally, we reach a large meadow at an altitude of 650 m and park our second car here (5.5 km from P2 to P1).

Approach: (machine translated)
From the parking lot down the path to the stream (600m altitude).

Tour: (machine translated)
After a longer run in the stream, the vertical part with a C30, followed by a C60. Then the possibility of an exit to the right up to the road. The route continues for a good 1.5 hours until the last (6m) rappel. Where the stream from the Val d'Arc flows in from the right, the descent comes to an exit.

Return: (machine translated)
In the streambed of the Val d'Arc up to the bridge and the road.

Coordinates:
Canyon Start 45.9922 12.0304
Parking at Entry 45.9880 12.0319
Canyon End 46.0203 12.0494
Parking at Exit 46.0191 12.0520

Bigger, wilder and deeper than what may appear from the description. You have to love walking in a rocky riverbed, but the sporty 30, the quite nice 60 and impressive narrow parts make up for the effort. I would definitely repeat. Anchors ok, there's even choices. Added a M10 SS bolt + hanger on the left of the old pitons with ropes in the final 5m abseil. If the next group likes this location, the ropes can be taken down, should be much cleaner.

After about 80mm of rain from Tuesday to Sunday night, the brook was flowing at a very strong and dangerous rate. Arriving at the most watery rappel of the canyon, the one on the 20 meters, the pool below was all white and boiling continuously. We turned back, momentarily abandoning some ropes in the three jumps at the beginning of the canyon. Here is the link to monitor rainfall amounts in the area, changing reference stations. https://www.arpa.veneto.it/dati-ambientali/dati-storici/meteo-idro-nivo/meteo60giorni?codseqst=300001580 (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Rimonta Dopo circa 80mm di pioggia da Martedì a Domenica notte, il rio si presentava con una portata molto forte e pericolosa. Arrivati alla calata più acquatica della forra, quella sui 20 metri, la pozza sottostante era tutta bianca e bolliva continuamente. Siamo tornati indietro, abbandonando momentaneamente alcune corde nei tre salti di inizio canyon. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23787/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Rimonta Subito dopo confluenza con la val d\'Arc sulla dx c'è un comodo sentiero che porta alla strada dove dopo 100 metri su una curva verso dx si possono lasciare comodamente le auto a valle. Per ingresso a monte è meglio parcheggiare auto a sinistra (lato opposto del grande prato) e tornare indietro a piedi fino a trovare alla propria sx una traccia battuta che scende nel greto. Dal greto ad inizio forra altri dieci minuti. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23787/observations.html)

Stands tip top except for the last 5 m rappel (there are only 3 rappels in total). The 5 m rappel is a bit dubious with 2 normal pitons connected with a rope, but ok. No comparison to the Maor, but still nice. You have to like walking in the streambed. Very lonely ambience. (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Rimonta Armi ok, anche se sarebbe meglio cambiare qualche cordino e qualche placchetta+catena.Il punto di ingresso segnato in questo sito è errato (si cammina inutilmente nel greto per 25 minuti) perché rispetto al park si deve tornare indietro ad inizio del prato e da lì cercare un sentiero/traccia che conduce nel greto a 575mslm e dopo una curva a dx del torrente si sbatte sul primo inforramento con tre tuffi consecutivi, calata sui 20 metri e poi La Pisota.Altri due inforramenti (più lunghi ed orizzontali del primo), uno a 500mslm ed un altro a circa 420mslm.Prima di arrivare ad una briglia c'è un sentiero ripido in riva dx che porta ad una strada sterrata che finisce in un tornante su strada asfaltata a quota 380mslm. In questo punto si può usare come park a valle per poi fare navetta di 5,2km. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23787/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Rimonta Nei due giorni precedenti sono scesi circa 70mm di pioggia e quindi nel torrente c'era troppa acqua. Nessuna presenza di neve, ma solo di acqua, anche nei sentieri di avvicinamento. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23787/observations.html)
