Specialities:

Gear:

Summary: (machine translated)
Generally dry except after heavy rains, this is an initiation canyon, boxed in but with loopholes.

Hydrology:

Access: (machine translated)
From Villalba de la Sierra towards Uña, about 2 km before reaching the Mirador del Ventano del Diablo, on the left side there is a track of about 300m that leads to the parking lot where you must request permission in: https://www.ferratavillalbadelasierra.com/
Another option is to park on the right side of the road in the curve that goes up to the ventano, in the area that widens (old road).

Approach: (machine translated)
About 100m before the curve we have the stream on the right, uphill. We go up it for 1.5 kms, cross the riverbed and continue climbing a few more meters until we find a track, we take it to the left and it brings us back to the ravine, we access the ravine.

Tour: (machine translated)
See mole, initiation with water only after heavy rains

Return: (machine translated)
We will retrace the access path
