Transport:	**Rock type:**	**Drainage area:** 8.79km²
Season:	**Orientation:** South	**Best Time:**
Rating: ☆ 3.4 (3)	**Info:** ★ 0 ()	**Belay:** ★ 2 (1)

Specialities:

Gear:
Ropes: 3x40m

Summary: (machine translated)
Rappel canyon of high continuity. South facing.

Hydrology:

Access: (machine translated)
From the direction of Turin via Susa to Oulx. Alternatively, from Chambery through the Mont-Cenis tunnel. We leave the A32 (Autostrada del Frejus) via the exit Oulx-Ovest and immediately cross the Fiume Dora Riparia on its northern bank. Immediately after the bridge turn right and 900m to the bridge over the wide gravel bed of the Rio Seguret. Immediately before the bridge we turn left. We now drive along the Rio Seguret for about 100m until the tarred road makes a bend to the left. Here, where a dirt road begins that continues straight ahead along the river, we park our car.

Approach: (machine translated)
We cross the Rio Seguret to the eastern bank, and follow the trail that goes up the mountain in a northeasterly direction to the Auberge Inferiore (1325m altitude). From here we take the "Sentiero Balcone"- n. "19" which, passing the Auberge di Mezzo (1420m), heads west towards the cut of the Rio Seguret. Where it turns half-right, we come across an old water pipe, which we follow (orange markers) to the streambed (entry).

Tour: (machine translated)
Sequence of about 30 rappel. The belay stations are sometimes not optimally set up and the rope retrival can sometimes cause problems.

Return: (machine translated)
After the final rappel out to the right and on the slope to the car.

Coordinates:
Canyon Start 45.0519 6.8302
Canyon End 45.0467 6.8330

Automatisch importiert von Descente-Canyon.com für Canyon Seguret Approche évidente en suivant les indications du topo.Équipement très vieillissant, de nombreux points sont corrodés (mélange acier/inox).....Descente sympathique si on passe dans le coin; un travail de rééquipement et de bucheronnage pourrait permettre de profiter sereinement de la descente.On remarquera l'amour des locaux pour les prises d'eau sauvages dans la partie finale. Automatisch importiert von Descente-Canyon.com für Canyon Seguret Complément d’équipement dans les parties manquantes relativement récent(goujon inox) en place. Beaucoup de mono point pour petit ressauts. Certaines cordelette ou sangle mérite le remplacement.Dommage qu’il est autant de bloc et troncs d’arbres en travers. Gros courant d’air dans le canyon.Prendre Kway.Fait en 5h à 3 (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2631/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Seguret Canyon très esthétique. L’équipement est vieillissant. Beaucoup de monopoints avec quelques plaquettes rouillées. De nouveaux points ont été ajoutés et placés à des endroits stratégiques.Nous avons changé quelques cordelettes mais bien prendre de la corde à laisser pour en changer encore.Le relai de la dernière cascade se réalise en rive droite sur un arbre en travers de la rivière. It may be the water level but it was a bomb! Continuous rappels in a beautiful environment in places quite forked; weapons are not the best probably also floods make effect similar to Claretto & co, we added die weapons... recoveries always to check for pa presence of logs in the riverbed. A crisp access is followed by a deep canyon with many abseils. Some of the anchor points are very old and there is a lot of dead wood in the canyon. Photos, videos and GPS tracks: https://www.christian-balla.de/Seguret (machine translated)
