**Summary:** (machine translated)

Mainly open canyon with some nice passages. Suitable as a fallback option when other canyons (including Cuestis and Chiampeit) have too much water.

**Hydrology:**

**Access:** (machine translated)

From the south on the SS 13 Udine - Tarvisio after Chiusaforte you come to Vidali. Here park to the left of the road not far from a bar. 100m further the road crosses the stream, next to it small devotional site.  
Continue north with the second car. After 500m (the road turns right to Dogna) turn left to Plagnis and Visocco. The road crosses 2 small villages and after about 2km reaches the houses of Plagnis. Here the asphalt road turns into a gravel road. Continue on it for about 400m until it crosses the stream. Parking is possible in the streambed.

**Approach:** (machine translated)

Downclimb from the slope over rocks directly into the streambed.

**Tour:** (machine translated)

The rappel (max. approx. 35m) is mostly done from single anchors or rope slings on trees. Almost always could also be rappelled from trees. There are many emergency exits through steep forest. At the exit the anchors become sparse, but this is hardly a problem.

**Return:** (machine translated)

Directly before the road bridge right over small scree slope or already before left.
