Summary: (machine translated)
A long, rugged, and remote hike with few walking passages and some very scenic spots. Overnight accommodations are available at the unstaffed Casera Lodina at 1,560 meters.

Hydrology:

Access: (machine translated)
From Cimolais, head north into the Torrente Cimoliana valley. After about 2 km, park on the left before the bridge over the Torrente Compol. After that, the road becomes a toll road.

Approach: (machine translated)
Before the bridge, turn left into the Torrente Compol valley. Follow hiking trail 374 to Casera Lodina. The trail starts on a forest road, then soon turns onto a relatively steep hiking path that leads high above the canyon down to the valley floor of the Torrente Compol. At a trail junction, take the left path. Pass through massive cleared windfall areas and deciduous forest to the meadows below Casera Lodina. The hunters path to the canyon branches off just above a fenced-in spring. Casera Lodina is an unstaffed hut with a wood-burning stove and 6 sleeping spots with mattresses; it offers a rustic option to shorten the access slightly.
A short stretch through partially cleared mountain pines leads to a small saddle; then the path traverses to a dry streambed and, crossing slightly uphill through abandoned pastureland, returns to the mountain forest. The path is marked by a relatively large number of cairns and is usually easy to follow. Below the mountain pine summit “La Brustolada,” you emerge from the mountain forest into open terrain. Just before crossing a dry streambed—and immediately after crossing a stream with flowing water—follow the trail traces horizontally to the right; the main trail leads diagonally left uphill. Head horizontally through the forest on the other side, then ascend across the next meadow before re-entering the mountain pine forest. Follow a barely defined path (currently about 30 meters of mountain pine thicket—a saw would be helpful here) to a streambed, then descend briefly in the open terrain before continuing northward to the main stream. Descend about 50 meters in elevation along the streambed to the base of the waterfalls.

Tour: (machine translated)
Initially, thinly banked layered limestone.
Downclimb 20 m
C 20 m ring hook on the left
Downclimb 5 m
C 20 m ring hook on the left
C 10 m ring hook on the left
C 20 m ring hook on the right
C 30 m ring hook on the left across several pools; a small side stream flows in from the right with a waterfall.
C 25 m ring hook on the left across a pool
From here on, solid white dolomite
Climb around the first waterfall on the left
Start of a low gorge
C 15m ring hook on the right
C 30m ring hook at the top left
Downclimb for 5 min; it might be possible to switch to the left side channel here
C 40m ring hook on the right
C 12m ring hook on the left
A side stream joins from the left with two beautiful waterfalls; beautiful gorge
C 25m over a pool from the ring hook on the left
C 12m from the ring hook on the left; small water fountain; may be slippery
Short walk
C 15m from the ring hook to a clamping block on the right
Downclimb to the right of the next clamping block
C 52m from ring hook on the left, very beautiful waterfall into a hanging pool
C 20m from ring hook on the right
Escape route to the right, then back into the gorge
C 20 m from the ring hook on the left
C 10 m from the ring hook on the left
C 12 m from the ring hook on the right
C 15 m from the ring hook on the left
C 25 m from the ring hook on the left, across two pools (difficult)
1.5m slide
C 10m from the ring hook on the left
5-minute hiking and downclimbing to hiking trail 374

Return: (machine translated)
Take Trail 374 back to the parking lot (slight uphill slope) or continue further along the streambed (maybe another gorge?)

Coordinates:
Canyon Start 46.3232 12.4184
Canyon End 46.3208 12.4277
Parking Entry and Exit 46.3137 12.4444
Overnight stay 46.3071 12.4249
