Transport:	**Rock type:**	**Drainage area:** km²
Season: June - November	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Dry ravine subsidiary to the left of the upper Isarre. In the rainy season we will find it with a trickle of water. Prohibited between December and June for nesting.

Hydrology:

Access: (machine translated)
Access to Foratata, Chines, Isarre Sup and Buitrera banks.
We must be located in Santa Eulalia la Mayor.
For it by the N240 direction Lleida we will go to Loporzano. From here to Sasa de Abadiado by the HU330 and here we continue to Castilsabás where we turn left to Santa Eulalia.
We will continue along the track that comes out after crossing the village, next to the church. After a few kilometers we arrive at a crossroads in the form of "Y", on the right we will go down towards the parking of the return car (Ermita de San Chinés). On this track towards the hermitage we will go until we find a chain, if it is not closed we will go to the same access of the hermitage.
With the access car we will go left towards Puntas de Baíl until we find a sharp right curve where we will find a chain.
We also have the option of leaving a car in Vadiello in the parking lot of the VF del Palomo.

Approach: (machine translated)
Access to the Foratata, Chines, Isarre Sup and Buitrera banks.
Option 1: We will continue towards Bail on the path and we will find a left curve where there is a panel to La Matosa where we will get on this well marked path, we leave the rock bridge to one side (access to Foratata) and continue straight ahead to the entrance of Isarre, soon we will reach the pass where we will have to turn to the south-east (access Buitreta) to go to Los Pepes, we pass them and we will find the access to this crevasse.
Option 2 without combination: Hard option. From the parking lot of access to the hermitage of San Chines we will go to this one and from here by the slope we will have to ascend to Los Pepes taking advantage of an access way marked with cairns. It is commented in several forums (we do not know) that there is no climbing at any time but it is not recommended if the ground is wet because there are exposed steps. If someone has more info... Thank you very much.

Tour: (machine translated)
Open but very interesting canyon, with two parts of rappels separated by a zone of intermediate skills. After the last rappel we will arrive at the Bco Isarre Sup at the height of the upwelling.

Return: (machine translated)
When we reach the end, we will be at the Isarre riverbank, which we can descend or take the San Chinés Hermitage path to go to the track of the return car.

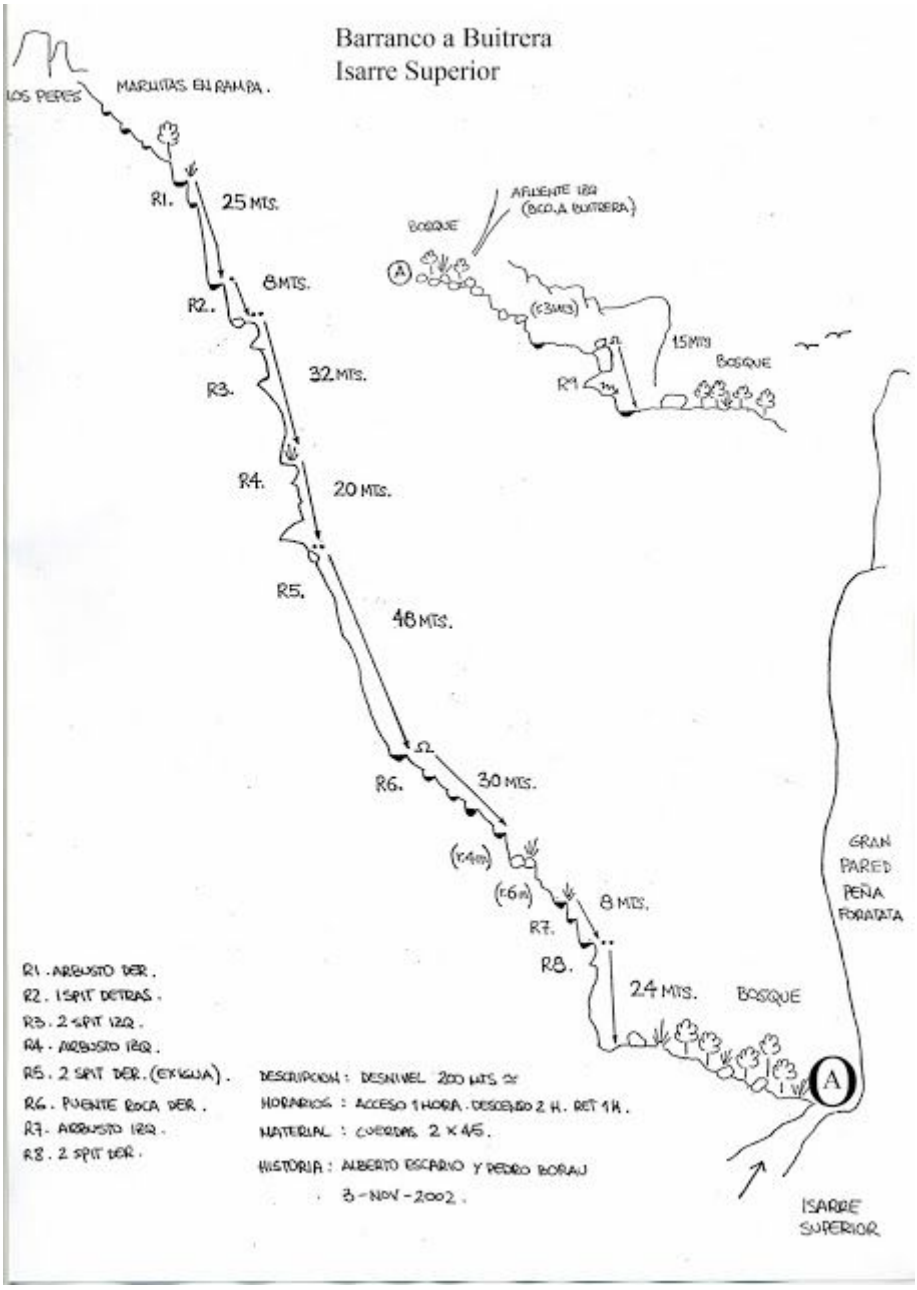

Coordinates:
Canyon Start 42.2420 -0.3063
