Ropes: 2x 45m

Summary: (machine translated)

2.5/4; 0/2 Smileys.

Trümmelbach I is the canyon with the highest entry in Switzerland. The panorama on the ascent alone is very impressive. The canyon is not particularly deep, but offers great rock formations and is extremely narrow in places.

Hydrology:

Access: (machine translated)

On the A8 highway, take exit 25 (Wilderswil) and then drive up the valley towards Lauterbrunnen. Cross the village and turn left shortly after the Weisse Lütschine towards the retirement home. Park at the exit of the road at a sports field or in the parking garage at Lauterbrunnen train station.

Approach: (machine translated)

From the parking lot to the train station and take the train to Kleine Scheidegg station and continue by train to the Eiger Glacier. Since the exit of 2020, it has been possible to take the Eiger Express from Grindelwald, which takes you directly to the Eiger Glacier station in 15 minutes. From the Eiger Glacier station, you continue hiking up on a blue and white marked trail, which initially runs along the railroad line. The path is exposed in some places, but there are fixed hand lines to help you over the steep parts. Continue along the path to an altitude of 2680m, from where you can begin the traverse to the right through the loose rock field to the start of the canyon.

Tour: (machine translated)

The canyon is more of a mini-canyon in terms of depth and width, especially at the beginning.

The water has ditched a very narrow and small slot towards the first abseiling points. After the first waterfalls, the canyon continues in beautifully polished rock and gets deeper and deeper. The canyon with its beautiful views and surroundings is a great adventure. At the exit, it continues right in front of the ice field and it is recommended to include Trümmelbach II in the same tour, as this combination works excellently. If Trümmelbach II is to be appended, you can enter the same stream after bypassing the snow/ice field and do some nice downclimbs and slides until you reach the start of Trümmelbach II.

Return: (machine translated)

If you only do Trümmelbach I, then leave the path at the snow/ice field to the right and traverse to Eigergletscher station, which is more or less at the same altitude. If you add Trümmelbach II, you can either hike up from the exit of the canyon to the Eigergletscher station or hike down to Wengernalp to catch the next train.
