Summary: (machine translated)
Dark, somewhat slippery rappel canyon.

Hydrology:

Access: (machine translated)
Coming from Oloron-Sainte-Marie, we drive 30.5 km in a southerly direction on the N-134 direction Spain (Col de Somport, Jaca). Then we turn right onto the D-239 to Lescun. We drive uphill in serpentines for 2.4 km. Here we take the road to the right and follow it for another 850 m. Here we park our car in a suitable place. Approach: (machine translated)
We then take the stony path, which first walks to the right - in an easterly direction, but then bends to the north-west and leads to the bridge over the Copen. Entry below the bridge.

Tour: (machine translated)
7 rappels in a beautiful forest gorge. Due to the slippery rock, caution is sometimes advised when accessing the belay.

Return: (machine translated)
At the small reservoir, turn right onto a metal footbridge and down a small ladder. Then we follow the abandoned railroad line - also through a tunnel - to the banks of the Aspe. If we haven't parked a second car here, one of us pulls out the "A....karte" and takes down the car parked at the top (good chances when hitchhiking).
