Summary: (machine translated)
Wild and remote, the Ossèse valley awaits us with this small gift. A waterfall of almost 40m with an almost immediate access and return. Perfect to combine with Ossèse Sup and Inf.

Hydrology:
Verano, otoño.

Access: (machine translated)
Cascade de Calie, Ossèse Inf and Ossèse Sup
We have to go to the parking of the Cagateille circus, for this we arrive at Saint Girons and go up the Salat river until we reach Oust and by the D3 we pass by Seix and Moilin Lauga until the detour (on the left) to Ustou by the D8. Pass through Le Trein and turn right on the D38 to St Lizier and continue to Stillom. At the bridge that crosses the river to Cagateille we must continue straight on to Ossèse. Park on arrival.

Approach: (machine translated)
Cascade de Calie, Ossèse Inf and Ossèse Sup
At the left turn before parking there is a small path to the right that leads down to the river.

Tour: (machine translated)
Short but very interesting descent. A small slide, an abseil and a waterfall of almost 40m.

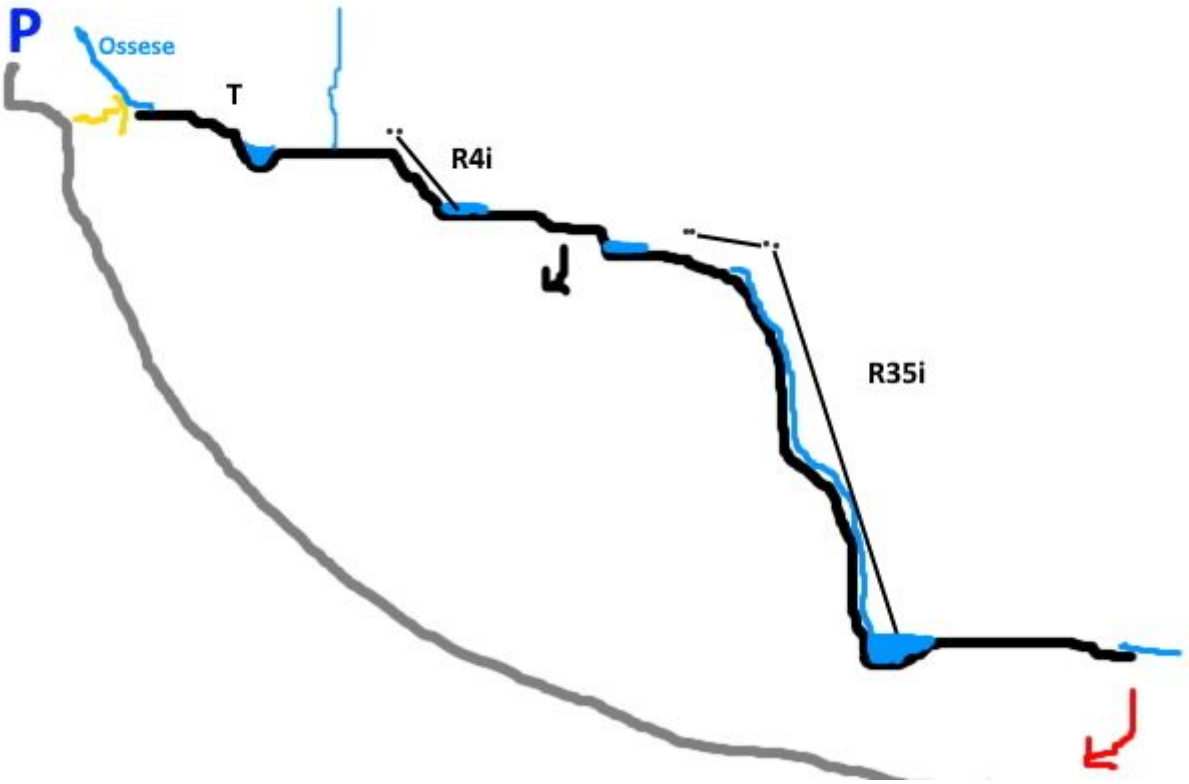

Return: (machine translated)
100m after the waterfall we climb up the steep slope to the road on the right.
