Ropes: 2x 90m

Summary: (machine translated)
A new, important route on the island, without any particular difficulties, apart from the approach, which is like walking through a cave.

Hydrology: (machine translated)
The real challenge of this route lies in the narrowness, the steep gradient and the heavily overgrown walls, which make rescue operations difficult.

All year round, preferably with a small refreshment of water reserves a few days beforehand.

A new, important route on the island, with no particular difficulties apart from the approach, which is like a cave hike.
ATTENTION: As this canyon is located in a sensitive area, its access is currently under negotiation. Please comply with the regulations.

Access: (machine translated)
Leave one vehicle at the bridge of the stairs for the arrival, then take the road towards Cascade du Chien (shared parking lot with Bras des Lianes, Bras Piton, Ravine Blanche).

Approach: (machine translated)
Take the GR long-distance path towards Belouve, leave it at the height of a firebreak, climb the ridge of the Pic des Lianes and then reach the Ravine Blanche. Cross the plateau until you reach a small canyon that leads to the R1.

Tour: (machine translated)
An entry and a slide take you to the bivouac (a beautiful balcony). You then descend over a large sloping area to the entrance of the barrier, then a magnificent 88 m descent leads you into the narrow passage, which opens up 10 abseils further down in the bed of the cave arm.

Return: (machine translated)
Once you are in the cave arm, follow the river for 300 m on the right, cross the cave arm and reach the footpath on the right that leads you to the "Pont de l'Escalier" bridge.

Automatisch importiert von Descente-Canyon.com für Canyon Coloscopie Sentier d'accès toujours visible. Toutefois la trace GPS est indispensable pour les non initiés. Pas de changement depuis le commentaire de PYK. Pas de rénovation de notre côté (nous n'étions que 2). (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21866/observations.html)

2026-03-28 | System User | |🕮 |⚓ | 〰 Normal | 👍 Completed
Automatisch importiert von Descente-Canyon.com für Canyon Coloscopie Marche d'approche : la partie la plus difficile a trouver (même avec un GPS) se situe entre ravine blanche et la première petite ravine qu'on traverse, ensuite c'est plus marqué et moins paumatoire. Équipement rénové sur la moitié des relais. Le reste des relais est constitué d'un goujon d'ouverture en acier doublé par un goujon inox datant de notre dernier passage en 2023.Mise à jour topo à venir rapidement (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21866/observations.html)
