Gear: Ropes: 2x30m		
Summary: (machine translated) Short tour in limestone with lots of water. The description and dates are listed for the Cotschna and Err combination, as they are usually done together anyway.		
Hydrology: (machine translated) Cotschna v4a4, rappel possible in the water, Err hardly ever has less than 500 L/s without ice.		
Access: (machine translated) Drive to Tinizong. The road to Pensa is redeemable for 5 francs, there is a parking lot just before the no driving sign, so it's best to drive up all together in one car.		
Approach: (machine translated) Either take the forest road or the hiking trail up to Motta d'Err. For Cotschna, pass Alp Viglia, otherwise go straight down to the stream.		
Tour: (machine translated) Cotschna was last done in about 2015, so the condition of the anchors should be checked. Several small rappels in a mighty gulch. It was drilled in 2024 so that you don't have to rappel in the water (only one step over the beam is necessary). At the narrowest rappel, a long rope traverse must be set up on the left before you can descend the last 15m vertically.		
Return: (machine translated) We return to Pensa over scree.		
Coordinates: Canyon Start 46.5859 9.6763 Canyon End 46.5847 9.6616

2024-11-06 Bibtore ★★★★★ 📖★★★ ⚓★ 🌊 Normal 🍏 Completed Cool to be able to climb something like this for the first time in Switzerland in 2024. For Cotschna you should probably take anchors with you, we didn't get up there today. (machine translated)
