Summary: (machine translated)
Beautiful ravine that is accessed from the town of Aizpun, Navarra. Normally it is dry, but sometimes, especially in winter or early spring it carries water. Its longest rappel is 53 meters and when it is dry the pools are stinking. Of great beauty that ends in front of the final waterfall of the Artazul.

Hydrology:

Access: (machine translated)
To make Licebar the ideal is to go in two cars, the access car we will leave it in Aizpun or in the Port of Ulzurrún. In both cases, leaving from Pamplona we will have to take the NA-7010 and then the NA-7020.
For the return car we will have to go to Ulzurrún and go down to the parking lot of the Arteta spring.

Approach: (machine translated)
From Aizpun we will leave by a path that goes down behind the houses towards the ravine. From the port of Ulzurrún from the curve to the left (Borda Gola) there is a small path towards the riverbed.
If we do not have combination of cars we can also leave it in the spring and go up by the orographic right of the river by a small path little marked.

Tour: (machine translated)
Short and continuous descent that with water is magnificent. The rappel of 60 can be done as a whole or split from the marmita.

Return: (machine translated)
Once at the junction with Artazul we only have to take the road to the right that leads to the parking lot.

Automatisch importiert von Descente-Canyon.com für Canyon Lizebar Canyon sec Les vasques ne sont pas encore verte mais ça ne saurait tarder. Je pense que en eau ce canyon à du potentiel mais sans eau, pas vraiment... Bof bof (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2956/observations.html)

Lizebar has one of the most beautiful abseils in Spain, when active. Contrary to Artazul, most pools can NOT be jumped. Natural dam (due to storm + consecutive rain) as well as two dead animals. We continued for an all-time classic day with Diablozulo in the afternoon.
