Really a lot of water after rain 📖 Stand at high rappel offers only little space (2 rings & a lug, not connected)
Access partly exposed, steep and brittle. (machine translated)

Access path is rather steep but obvious, a bit overgrown and short (start by the green handrail, up to a water tank or what, than follow the pipeline). Takes 20-25 minutes. The big one needs careful logistics: 2m + 6m + 32m + 50m, all on the right. The two later ones are free-hanging, but at least out of water. Not as slippery as it seems.

Beautiful and super short abseil gorge with a view of the sea. All stands okay. At the bottom again a clapping crowd on the road. :) (machine translated)

A very short canyon with a beautiful, breathtaking waterfall with a fascinating view. There are two waterfalls in the Agua Alto canyon. The upper waterfall is still cut in, the C90 open with a view of the Atlantic. The second cascade, about 90 meters high, ends right next to the road (VE2, São Vicente - Porto Moniz) and flows into the Atlantic Ocean. The 90-metre waterfall is accessed in several intermediate stages. (machine translated)
