A very slippery, long route with some very beautiful, long rappelling routes. One anchor is missing; if necessary, you can jump over it. The last person to rappel goes through the thorny bushes. (machine translated)

Varied canyon. Anchors ok. Some monopoints should be redoubled. (machine translated)

Partly very slippery, partly very grippy. Anchors mostly single, even on higher rappels. Last rappel before the water extraction is very botanical. (machine translated)
