Specialities:

Gear:

Summary: (machine translated)
Playground for canyoning. Many jumps, some walking passages.caution with little water!

Hydrology:

Access: (machine translated)
From Kötschach-Mauthen direction Hermagor, after Dellach turn right to Unternölbling. In Unternölbling follow the signs to the waterfall. Park at the bridge over the Nölblingbach.

Approach: (machine translated)
Before the bridge, there is an inconspicuous path on the right into the forest, follow this until you pass a power station, follow the forest road until you reach a barrier, here follow the very steep path on the left until you reach a forest road (not the first one on the left side). Follow the road until it turns into a path, continue here, after about 200m you come to a small dam, get in here.

Tour: (machine translated)
The first 350m you can easily go without neoprene.After that comes a mix of jumps, slides and rappel, always interrupted by some walking passages. After a 14m rappel in the lower part, the stream disappears completely for about 300m. Be careful when there is little water, leaving the pools can be very laborious! So take a good look at the individual places!

Return: (machine translated)
After the last rappel on the orographic right, follow the path to the car.

Today, some new 10 mm lugs were fitted and old rope slings were replaced. The route is only suitable for low or no water. At the bottom in the dry areas there are a few slides and ramps to climb down, without water no problem but if wet and water pressure then it is not safe to come down them. There are a few abseiling points, but in vain. From time to time, trees on the edge or hidden trees are the only alternative to get down. I always find the canyon great, although there is a lot to walk in between. (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Nölblinger Graben After rain it was not possible to go the Canyon. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23780/observations.html)

2024-07-02 | Friedl Martin | ☆ ☆ |🕮 ★ |⚓ ★ | 〰 Crazy | 📈 Emergency exit
The cold front brought 50 liters of rain the day before. We went down the first rappel at the power station and then decided to abort the tour. Over the course of the tour, countless small channels / streams were added. We then looked at the final waterfall from the parking lot and then the decision was justified for us.
