Country: France **Region:** Auvergne-Rhône-Alpes **Subregion:** Isère **Town:** Quaix en Chartreuse		
Difficulty: difficult	**Grading:** v5 a4 III	**Total time:** 1h40
Approachtime: 15min	**Tourtime:** 1h	**Returntime:** 25min
Altitude entry: 400m	**Altitude exit:** 345m	**Delta Altitude:** 55m
Canyon length: 350m	**Highest rapell:** 26m	**Amount rapells:** 4
Transport: on Foot	**Rock type:**	**Drainage area:** km²
Season:	**Orientation:** Northwest	**Best Time:**
Rating: ☆ 4 (8)	**Info:** ★ 2.2 (6)	**Belay:** ★ 2.5 (6)

Specialities:

Gear:
Ropes: 2x30m

Summary: (machine translated)
dark gorge

Hydrology:

Access: (machine translated)
Leave the city center of Grenoble via the Isère to the NNW and head for the suburb of St-Martin-le-Vinoux on the D 57 (also possible from St Engrêve). Now head uphill towards Quaix-en-Chartreuse. About 1 km before this village, the road bends sharply to the right across a side valley of the Vence. Immediately afterwards, park in the excavation pit on the left.

Approach: (machine translated)
A few meters back on the road, then a dirt road between forest and meadows descends in a south-easterly direction. On a flat saddle, before the path climbs again, an inconspicuous track runs off to the left (south-east) into the bushes. Follow this - steeply at the end - down to Vence and the entry to Infernet.

Tour: (machine translated)
The difficulty depends crucially on the - usually quite decent - water flow. Although the stands are usually set up to avoid the jet as much as possible, access to the stand above the 25 m rappel is quite exposed. Whirlpools and rollers then pose a further danger. Video and photos show a low water flow! At times (!) a guide rope was fixed to the right wall, which could be used to stay out of the powerful jet. But then about 40m abseil length above intermediate level.
Good to connect with Alloix.

Return: (machine translated)
After the canyon exit, before the water catchment, turn right up to the aforementioned saddle and from here back to the car.

Coordinates:
Canyon Start 45.2511 5.7117
Canyon End 45.2519 5.7093

Automatisch importiert von Descente-Canyon.com für Canyon Infernet Bonjour à tous,Nous avons fait l’infernet cet après midi avec ma fille et mon fils. On ne l’avait encore jamais fait. C’est un très beau canyon qui vaut le coup.Le temps donné est normalement de 1h de descente. Nous l’avons fait en 2h. La raison, sur la 4 mains courantes, les mains courantes 2 et 4 n’y étaient plus. Quelqu’un les a enlevé sans en remettre.Donc si vous prévoyez de faire le canyon, prenez de quoi les refaire. Nous avons perdu beaucoup de temps à cause de ça.Sinon rien à dire, les toboggans sont top. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2113/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Infernet Une eau bien froide ce jour. L'équipement de la main courante au départ est assez sportif, heureusement qu'il y a deux pédales au relais pour s'installer tranquillement. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2113/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Infernet DC tranquille. Les journées ont bien raccourcies, en refaisant les saut en afterwork on se retrouve rapidement a sortir a la tombé du jour. Les frontales ont été utile sur la remontée.
