Hydrology:

Access: (machine translated)
We must be located in Oroz-Betelu. To do this from Pamplona on the NA150 towards Aoiz. When we reach Villaveta we turn off onto the NA1720 (Aoiz) and just as we reach the village we turn left at the traffic circle, towards Oroz.
After a few kilometers we will have a detour to the right to the NA2040 to Oroz and we will continue to the Foz de Iñarbe. At the reservoir, in a long left curve there is a parking lot, we can leave the car here or a few hundred meters ahead in a lay-by on the left or right before reaching the bridge.
With the access car we continue to Oroz, when we reach the village we turn left onto San Martin street and follow it to the village of Gorraiz. Before reaching the village there is a closed recurve, park here.

Approach: (machine translated)
We follow the track/path that comes out of the curve and crosses the creek a couple of times until we see the beginning of the ledges.

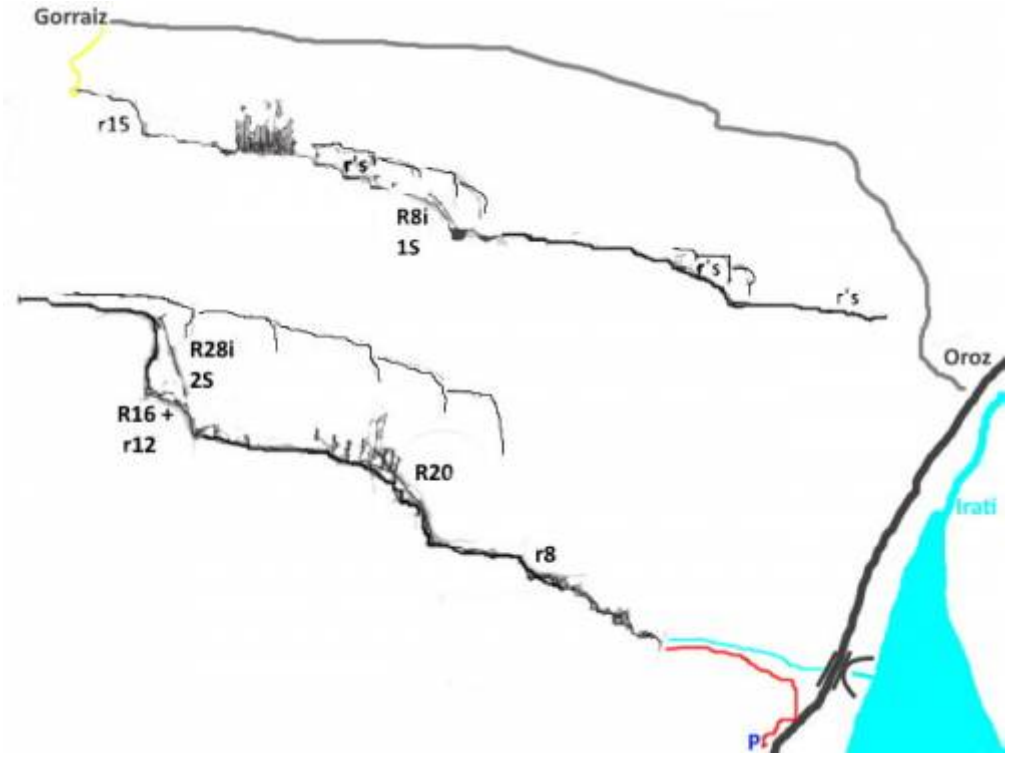

Tour: (machine translated)
Virgin descent with only 3 rappels installed. We have more skills that we will be able to rappel to the natural one or to dexter outside the riverbed.

Return: (machine translated)
When we reach the reservoir, we turn right onto the road.
