Summary: (machine translated)
Short slippery canyon; clean cold water; few short rappels; problematic when there is a lot of water; emergency exit possible to the narrows on the right via steep slope.

Hydrology:

Access: (machine translated)
From Sbg. Süd ri Berchtesgaden --> after the border in St Leonhard drive to the large parking lot for hikers to the left of the main road --> park here.

Approach: (machine translated)
From the parking lot, continue on foot along the main road towards Markschellenberg (do not take the hiking trail up to the Toni Lenz Hut) --> after a few meters, cross the road bridge (Rothmannbach) --> here, on a slope, there are a few houses with an access road --> follow the road up briefly to a steep meadow (shortcut) --> above this meadow, you will meet a mountain road (goes up from Marktschellenberg) --> follow the road to the right until you reach the last house (here, you could possibly from the last house it goes on the forest road (gravel) for about 10min slightly uphill to a fork --> here right slightly downhill to the stream (small stone bridge) --> entry at about 580Hm.

Tour: (machine translated)
The Rothmannbach is suitable for beginners or as a short pre- or afternoon tour. afternoon tour --> the water is clean and cold --> in the canyon you meet the Untersberg marble (red limestone) which is often found in the area --> at the beginning there are short walking and climbing passages (in some places a short rope can often be helpful) --> after several small pools, climbing and walking passages there is a larger blockage with an inflow from the left --> at this point downclimb to the right --> after approx. 50m there are several big rocks --> here you have an emergency exit (right over steep slope) --> the next spot can be slid or bypassed --> a narrow spot with a shallow cascade follows --> at the end of the cascade there is a big clamping block + fixed rope right --> jumping from the clamping block is possible after checking the water depth --> after that there is a rope traverse + 8m abseil into pools (possibly (possible jump) --> walking and rappelling --> left approx. 10m rappel into grotto (alternative rappel point left above approx.20m outside the watercourse) + 1m jump in pool under a big clamping block --> walk/swim in narrow passage up to a fixed rope +small jump right --> continue approx. 500m in open streambed up to a wooden bridge at approx. 470Hm.

Return: (machine translated)
From the wooden bridge past the big house and left along the road back to the parking lot

All fixed equipment is in good condition. All risky sections can be bypassed via via ferrata routes. There are also cable cars. The fixed ropes are older, but there are plenty of them. Slippery 6/10. (machine translated)

Some of the rope traverses are quite old, but fortunately there is enough metal in the canyon ◫ You can tell that it is also run commercially (machine translated)
