2026-10-17 | Matteo Delfitto | ★★ | 📖 | ⚓ | 🌊 Normal | ❤️ Not done

A canyon with a high water flow year-round (a 50-km² watershed that draws water from several peaks over 3,000 meters and about ten lakes, with no water diversions). The first part of the canyon features several waterfalls in a beautiful setting; some sections require good water skills (pools with strong backwash, a turbulent overhanging pool, etc.). Then the terrain levels out and the stream flows gently between towering vertical walls (the riverbed is wide, however); you exit on the left at a small trail that climbs to Vogna di Sotto—not easy to spot—or you can continue down the lower section. As of now, it is not equipped; the first waterfall has bolts for a handrail and a rappel, but there are no anchor plates. Bring all the gear needed for an exploration if you plan to descend.
