Country: Slovenija / Slovenia **Region:** Zahodna Slovenija / Western Slovenia **Subregion:** Goriška / Gorizia Statistical Region **Town:** Zaga		
Difficulty: easy	**Grading:** v2 a2 II	**Total time:** 2h30
Approachtime: 30min	**Tourtime:** 2h	**Returntime:** 0min
Altitude entry: 480m	**Altitude exit:** 370m	**Delta Altitude:** 110m
Canyon length: 1000m	**Highest rapell:** 25m	**Amount rapells:** 6
Transport: on Foot	**Rock type:**	**Drainage area:** km²
Season:	**Orientation:**	**Best Time:**
Rating: ☆ 3.6 (7)	**Info:** ★ 3 (5)	**Belay:** ★ 3 (5)

Specialities:

Gear:
Ropes: 2x30m (1x40m/1x20m)

Summary: (machine translated)
Short but very beautiful canyon; clean water; limestone; unfortunately very much walked; almost in the entire course emergency exits; short access; 18m slide (?); rather open canyon; good alternative if other canyons too much water.

Hydrology:

Access: (machine translated)
From the village of Bovec in a southerly direction along the main road towards Nova Gorica --> always right along the Soca --> after the village of Zaga but before Serpenica there is a large parking lot on the left and on the right opposite an inconspicuous gravel road into the forest --> follow this to the exit --> parking lot (380Hm).

Approach: (machine translated)
From the parking lot you can already see the last steps of the canyon 18m/2m/3m --> from here it goes up the signposted hiking trail --> you always have views into the canyon --> first keep left, but then turn right over a stone wall --> follow the signs up to approx. 550Hm (larger flat forest floor area) --> here follow the path to the left towards the streambed and descend over a steep boulder field with rope traverses to approx. 480Hm (entry).

Tour: (machine translated)
Once in the canyon, you immediately start with many small slides and pools --> the slides are max. 3m high and can partly be bypassed or rappelled --> as the canyon is very popular, fixed ropes have been installed for bypasses --> there are entry and exit points throughout the canyon --> the highest rappel point C25 left is in the middle section and secured with rope traverses (left also possible to bypass) --> several small jumps and slides + rappels on fixed ropes follow --> the highest rappel point C25 left is in the middle section and secured with rope traverses. (bypass also possible) --> there are several small jumps and slides + rappels on fixed ropes --> in the lower part you come to the stone bridge already crossed on access, there is a 15m rappel (right). After a few rappels you will come to a large clamping block under which the water drops (C10 abseil or slide) (!!! If the water level is high!) --> further downclimbing and a rappel with 18m announce the exit of the canyon (a part of the 18m is also gladly slid, but is to be enjoyed with caution as the slide runs almost vertically, the pool is deep but very narrow) --> before the exit pool you have 2 jumps which you can also downclimb (slippery!).

Return: (machine translated)
Exit directly at the parking lot at 370Hm.

Coordinates:
Canyon Start 46.2911 13.4866
Canyon End 46.2952 13.4894

Massive fun canyon with many small to high slides I had 1x 50m rope with me as the rappels are nice too The cave slide and a 6 m jump are covered waist-high with gravel... The last high slide is super and can be easily slid without a rope - the best thing about it: you can get back on immediately and repeat. So 3x slides, 3x fun had (machine translated)

We were the first group to start shortly before 8am - at the exit 1h 25 later the entire parking lot was full, so it pays to start early. Almost no gravel in the pools this year, we were actually able to jump/slide almost everything (despite a bit less water than normal), the rest had new fixed ropes. (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Susec Canyon très sympa, eau assez chaude, équipement nickel. Le canyon peut se commencer plus haut que la description avec 2 cordes de 40m. Sur la marche d’approche, ne pas prendre le chemin des guides, continuez un chemin qui monte toujours en RG jusqu’à passer devant un petit hameau, le chemin redescend juste après et on arrive au départ (20 à 30min de marche en plus). Dans cette partie il y a une cascade d’une vingtaine de mètres, une de 10m environ puis une cascade d’environ 35mètres (on avait 2x40m). Cette partie n’est pas faite par les guides donc vous serez seul. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2703/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Susec Fait en soirée pour échapper à la foule (à 17h et quelques au parking, encore 18 véhicules de pros !). Jolie descente facile quand on est tout seuls ;) Suréquipé, il est possible de contourner les deux grandes (prévoir un gros 2*25m pour la première depuis le relais du haut). Bien vérifier les sauts/tob, tout ne passe pas ! (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2703/observations.html)
