Summary: (machine translated)
Hiking canyon with smaller rappel. Interesting combination of two canyons (second canyon Prousos).

Hydrology:

Access: (machine translated)
From Karpenisi in southwestern direction to Prousos (31 km). From here continue in a southerly direction. We leave the main road to Thermos/Lampiri to the right, continue straight towards Kastania and come down to the bridge at the exit of the Mavri Spilia canyon. We continue for about 3.5 km and then turn left down to the village of Tornos. We park our car in the square in front of the village.

Approach: (machine translated)
At the church, a paved path descends to the left, which soon mutates into a pad. We meet an open water pipe and follow the path to the left. After passing below a water reservoir, we take the path that descends to the right and meets a horizontal slope. Here a few meters to the right and then following the sign 'Tornos Canyon 100 m' left (northeast) down to the stream. Entry at the bridge.

Tour: (machine translated)
Where the Chalikorema joins the Prousos flowing in from the left, up the Prousos. We come to a gorge constriction with the name 'Mikro Pantavrehi' (pantavrehi = everything rains). Here you could immediately go right up to the slope and then left over the bridge back to the village of Tornos, but it is worthwhile to continue in the Prousos a few meters further up the stream to the next interesting narrow point.

Return: (machine translated)
Before this bottleneck (after having looked at it) we go right (westward) on an inconspicuous path up to the said track, on it left over the bridge high above the Prousos and then continue following the track until we meet our approach path. Return along this path to the village of Tornos.
